Natural Resources Sustainability And Humanity A Comprehensive View:

Natural Resources, Sustainability and Humanity Angela Mendonca, Ana Cunha, Ranjan Chakrabarti, 2012-04-17 Shortly this book is the written up graded version of the topics discussed during the Small Meeting of the 2nd International School Congress Natural Resources Sustainability and Humanity held in Braga Portugal 5 8 May 2010 with the diverse participation of scientists educators and governmental representatives The Earth hosts an immense ecosystem colonized by millions of species for billions of years but only for a few tens of thousands of years by humans Environmental history tells though that it was humankind that shaped the environment as no other species History geography religion and politics among other reasons have differentiated populations with respect to access to safe food and water education health and to space and natural resource utilization The globalization era of trade information and communication is shortening distances and increasing overall wealth but as is pointed out in this book it is also contributing to the propagation of diseases and to the modification or even destruction of native ecosystems by exotic invasive species Man is the only species that has the perception of its history evolution of the consequences of its decisions and that there is a future ahead It is also the only species that has the potential to change it This awareness can be a source of anxiety and contradictory behaviours but it is also the key to changing attitudes towards the construction of a common sustainable home by committed education interdisciplinary approaches mobilization and empowerment of people and political consonant actions **VISIONS 2100**

John K. O'Brien, 2015-11-02 Stories from Your Future The complex issue of climate change is one that our race is struggling to address The solutions are not beyond us in any way Technological solutions exist scientific knowledge is plentiful the world can afford the transition but still significant action eludes us Rational arguments for rapid action abound We do not need any more of those What is needed is a different way of communicating that inspires and attracts the widest possible group of humans towards wanting to travel on this same journey As part of the VISIONS 2100 Project this book tells of the power of Visions and invites the reader to create and share their own vision of a better world Only by starting conversations of the future will we manage to build the world that we really want The book balances worries about catastrophe with social and environmental improvements by referencing psychology management thought case studies and personal anecdotes In also references the parallels between the world's journey and coping with the chronic illness of the author's wife The book is framed around eighty short visions by some of the world's leading environmental thinkers including Mary Robinson Christiana Figueres Bill McKibben Connie Hedegaard Yvo de Boer and many others Having a vision of a better world is likely to result in the world being better Poverty is eradicated Every child goes to school regardless of sex race religion or place of birth Every woman enjoys equality with every man Every household has access to energy In 2100 the world is just Mary Robinson Special Envoy on Climate Change United Nations Opportunity from 2100 forward is unimaginably vast and incredibly varied Christiana Figueres Executive Secretary UNFCCC Timing is everything and it hurts to think we blew it Bill
