Handbook of the Logic of Argument and Inference R.H. Johnson,H.J. Ohlbach,Dov M. Gabbay,John Woods,2002-09-11 The Handbook of the Logic of Argument and Inference is an authoritative reference work in a single volume designed for the attention of senior undergraduates graduate students and researchers in all the leading research areas concerned with the logic of practical argument and inference After an introductory chapter the role of standard logics is surveyed in two chapters These chapters can serve as a mini course for interested readers in deductive and inductive logic or as a refresher Then follow two chapters of criticism one the internal critique and the other the empirical critique The first deals with objections to standard logics as theories of argument and inference arising from the research programme in philosophical logic The second canvasses criticisms arising from work in cognitive and experimental psychology The next five chapters deal with developments in dialogue logic interrogative logic informal logic probability logic and artificial intelligence The last chapter surveys formal approaches to practical reasoning and anticipates possible future developments Taken as a whole the Handbook is a single volume indication of the present state of the logic of argument and inference at its conceptual and theoretical best Future editions will periodically incorporate significant new developments

The A to Z of Logic Harry J. Gensler,2010-02-12 The A to Z of Logic introduces the central concepts of the field in a series of brief non technical cross referenced dictionary entries The 352 alphabetically arranged entries give a clear basic introduction to a very broad range of logical topics Entries can be found on deductive systems such as propositional logic modal logic deontic logic temporal logic set theory many valued logic mereology and paraconsistent logic Similarly there are entries on topics relating to those previously mentioned such as negation conditionals truth tables and proofs Historical periods and figures are also covered including ancient logic medieval logic Buddhist logic Aristotle Ockham Boole Frege Russell G del and Quine There are even entries relating logic to other areas and topics like biology computers ethics gender God psychology metaphysics abstract entities algorithms the ad hominem fallacy inductive logic informal logic the liar paradox metalogic philosophy of logic and software for learning logic In addition to the dictionary there is a substantial chronology listing the main events in the history of logic an introduction that sketches the central ideas of logic and how it has evolved into what it is today and an extensive bibliography of related readings This book is not only useful for specialists but also understandable to students and other beginners in the field

Ad Hominem Arguments Douglas Walton,1998 A vital contribution to legal theory and media and civic discourse In the 1860s northern newspapers attacked Abraham Lincoln s policies by attacking his character using the terms drunk baboon too slow foolish and dishonest Steadily on the increase in political argumentation since then the argumentum ad hominem or personal attack argument has now been carefully refined as an instrument of oppo tactics and going negative by the public relations experts who craft political campaigns at the national level In this definitive treatment of one of the most important concepts in argumentation theory and informal logic Douglas Walton presents a

normative framework for identifying and evaluating ad hominem or personal attack arguments Personal attack arguments have often proved to be so effective in election campaigns for example that even while condemning them politicians have not stopped using them In the media in the courtroom and in everyday confrontation ad hominem arguments are easy to put forward as accusations are difficult to refute and often have an extremely powerful effect on persuading an audience Walton gives a clear method for analyzing and evaluating cases of ad hominem arguments found in everyday argumentation His analysis classifies the ad hominem argument into five clearly defined subtypes abusive direct circumstantial bias poisoning the well and tu quoque you re just as bad arguments and gives methods for evaluating each type Each subtype is given a well defined form as a recognizable type of argument The numerous case studies show in concrete terms many practical aspects of how to use textual evidence to identify and analyze fallacies and to evaluate argumentation as fallacious or not in particular cases

Scare Tactics Douglas Walton, 2013-06-29 Scare Tactics the first book on the subject provides a theory of the structure of reasoning used in fear and threat appeal argumentation Such arguments come under the heading of the argumentum ad baculum the argument to the stick club traditionally treated as a fallacy in the logic textbooks The new dialectical theory is based on case studies of many interesting examples of the use of these arguments in advertising public relations politics international negotiations and everyday argumentation on all kinds of subjects Many of these arguments are amusing once you see the clever tactic used others are scary Some of the arguments appear to be quite reasonable while others are highly suspicious or even outrageously fraudulent In addition to the examples taken from logic textbooks other cases treated come from a variety of sources including political debates legal arguments and arguments from media sources like magazine articles and television ads The purpose of this book is to explain how such arguments work as devices of persuasion and to develop a method for analyzing and evaluating their reasonable and fallacious uses in particular cases The book shows how such arguments share a common structure revealing several distinctive forms of argument nested within each other Based on its account of this cognitive structure the new dialectical theory presents methods for identifying analyzing and evaluating these arguments as they are used in specific cases The book is a scholarly contribution to argumentation theory It is written in an accessible style and uses many colorful and provocative examples of fear and threat appeal arguments that are suitable for classroom discussions The matters treated will be of interest to professionals and students in law critical thinking advertising speech communication informal logic cognitive science rhetoric and media studies

Catalog of Copyright Entries. Third Series Library of Congress. Copyright Office, 1972 *The Question of Being in Husserl's Logical Investigations* J. Mensch, 2013-03-14 This study proposes a double thesis The first concerns the Logische Untersuchungen itself We will attempt to show that its statements about the nature of being are inconsistent and that this inconsistency is responsible for the failure of this work The second concerns the Logische Untersuchungen's relation to the Ideen The latter we propose is a response to the failure of the Logische Untersuchungen's ontology It can thus

be understood in terms of a shift in the ontology of the Logische Untersuchungen a shift motivated by the attempt to overcome the contradictory assertions of the Logische Untersuchungen In this sense our thesis is that in the technical meaning that Husserl gives the term the Logische Untersuchungen and the Ideen can be linked via a motivated path We can by way of an introduction clarify our theses by regard ing three elements The first is the relation of epistemology to ontology The second is the notion of motivation as Husserl conceives the term The third is the fundamental distinctions that are to be explained via the notion of motivation 1 We should begin by remarking that the goal of the Logische Untersuchungen is explicitly epistemological it is that of answer ing the cardinal question of epistemology the question concerning the objectivity of knowledge LU Tub ed I 8 F p 56V For Husserl his other questions i e **The Publishers Weekly** ,1972
