Accounting: Introduction To Financial Accounting Henry Dauderis, 2017      **Introduction to Financial Accounting** Henry Dauderis, David Annand, 2017-03-30  
This book contains the solutions to problems in the main Introduction to Financial Accounting Textbook. This text is intended for a first course in introductory financial accounting. It was updated to reflect current International Financial Reporting Standards (IFRS). For example, it reflects the recent change in IAS 38 para 98 allowing the use of multiple methods in amortizing intangible assets. It focuses on core Introductory Financial Accounting topics that match pre-requisite requirements for students advancing to Intermediate Financial Accounting. Excluded are advanced topics that are covered in Intermediate Financial Accounting such as leases and bond amortization. The text takes a corporate approach vs. beginning with a sole proprietorship emphasis and then converting to a corporate approach. This consistency throughout the book reduces confusion for the introductory student.

**Answers and Solutions; Mathematics of Accounting** Arthur B. Curtis, John Hurlie Cooper, 1925      **Introduction to Financial Accounting**, *Introduction to Financial Accounting* Henry Dauderis, David Annand, 2019  
This textbook is an adaptation by Athabasca University of the original text written by D. Annand and H. Dauderis. It is intended for use in entry-level college and university courses in financial accounting. A corporate approach is utilized consistently throughout the book. The adapted textbook includes multiple ancillary student and instructor resources. Student aids include solutions to all end-of-chapter questions and problems and randomly generated spreadsheet problems that cover key concepts of each chapter. These provide unlimited practice and feedback for students. Instructor aids include an exam bank, lecture slides, and a comprehensive end-of-term case assignment. This requires students to prepare 18 different year-end adjusting entries and all four types of financial statements and to calculate and analyze 16 different financial statement ratios. Unique versions can be created for any number of individual students or groups. Tailored solutions are provided for instructors.
