Lufthansa Annual Report 1997:

Incumbent Inertia in Light of Disruptive Change in the Airline Industry: Causal Factors and Top Management Moderators Oliver Viellechner, 2010-08-01 Oliver Viellechner addresses the response behavior of incumbent firms when facing discontinuous change by innovative business models. Almost always this entails a problem of inertia, i.e. the sluggishness of incumbent response due to insecurity in deciding on an adequate response strategy. Viellechner investigates disruptive change in the European airline industry during the 1990s when low cost airlines severely challenged established carriers. By conducting four case studies he identifies new causes of inertia and reveals the role of top management teams in improving incumbent firms responsiveness. Viellechner's new book is relevant to both researchers and managers. It links concepts of strategy, organizational and psychological research and sheds light on the new competitive structure of an industry which has been repeatedly challenged by entrants and external shocks.

Risk Management Michael Frenkel, Ulrich Hommel, Markus Rudolf, 2005-12-06. Dealing with all aspects of risk management that have undergone significant innovation in recent years, this book aims at being a reference work in its field. Different to other books on the topic it addresses the challenges and opportunities facing the different risk management types in banks, insurance companies and the corporate sector. Due to the rising volatility in the financial markets as well as political and operational risks affecting the business sector in general, capital adequacy rules are equally important for non-financial companies. For the banking sector the book emphasizes the modifications implied by the Basel II proposal. The volume has been written for academics as well as practitioners in particular finance specialists. It is unique in bringing together such a wide array of experts and correspondingly offers a complete coverage of recent developments in risk management.

Innovation in Commoditized Service Industries Maximilian Rothkopf, 2009. The passenger airline industry is a prominent service industry that is becoming increasingly commoditized. As little empirical work in this field exists, this study contributes to research by exploring how passenger airlines leverage innovation in such market conditions from a strategic and organizational view. Comprehensive case studies of a sample of eight passenger airlines constitute the empirical basis. The analysis detects patterns of innovations and draws conclusions on the strategic innovation behavior in the airline industry. The study proposes an organizational concept and a strategic approach for airlines to innovate in an increasingly commoditized market.

Life After Privatization Raj S. Chari, 2015. *Life After Privatization* offers a refreshing and original theoretical conceptualization of what happened to state-owned enterprises after they were privatized from the late 1970s onwards. Some privatized firms have become today's European and global giants. Alphas merging with or acquiring other firms, whereas other firms, Betas, have been taken over by Alphas or other

sectoral leaders The book raises questions such as which privatized firms in the airline automobile and the electricity sectors in the UK France Germany Italy and Spain are Alphas and Betas today And why Building on a variety of themes from both Political Science and Business Studies it considers a comprehensive set of explanations both internal and external to the firm to analyse why a firm may become an Alpha or a Beta The evidence shows that while internal factors are important the more external political factors are necessary and sufficient to explain why a firm becomes an Alpha or a Beta This includes the impact of liberalization the roles of states and the actions of regulators that are lobbied by firms Based on exhaustive evidence Life After Privatization concludes with a novel inductive theory which offers a significant step forward for social science scholars and practitioners understanding of the politics businesses face in global markets American Justice Laurence E. Gesell,2008 Business Rankings Annual Gale Group,1998-11 The staff of the Business Library of the Brooklyn Public Library answers more than 175 000 reference questions each year many of them requests for rankings information To provide quick answers to questions in the highest interest subject areas we have compiled Business Rankings Annual Working from a bibliographic file we have built up over the years we have culled thousands of items from periodicals newspapers financial services directories statistical annuals and other printed material The top ten from each of these rankings appears in this volume grouped under standard subject headings for easy browsing Typical entries provide sequential entry number rankings title A descriptive phrase identifying the contents of the list cited ranked by Indicates the criteria that establish the hierarchy remarks Provides additional details relating to the list from the source material number listed Notes the number of listees in the ranking source top 10 items on the list and source Readers can quickly locate all rankings in which a given company person or product appears by consulting the reference s comprehensive index In addition a complete listing of more than 300 sources used to compile Business Rankings Annual is provided in the bibliography Annual Report of the Council to the Assembly for ... International Civil Aviation Organization. Council,1994 1997 Medical and Health Annual ENCYCLOPAEDIA BRITANNICA.,1996 **Handbook of Airline Strategy** Gail F. Butler,Martin R. Keller,2001 *Growth from Chaos* Michael Pettus,2003-12-30 We live in a chaotic world Some of the chaos results from poor decision making e g Enron Arthur Andersen WorldCom Yet other aspects of chaos war terrorist attacks etc are beyond a firm s control This book demonstrates that firm growth is more dependent on how a firm develops its resource base over time Examining actual firm growth in several industries with a focus on trucking the airline industry and the North American railroad industry Pettus shows that a specific resource sequencing leads to higher firm growth than other sequencing patterns This sequencing pattern is similar across transportation industries and the pattern may be applicable to other industries Decisions that firms make with respect to how resources are developed must balance the need for growth in the current time period with the need for growth over the long term Firms can build sustainable growth by developing resources in a specific sequence in essence firms have control over their growth even when confronted with ever changing
