Autism Spectrum Disorders Dermot Bowler, 2007 Psychological research into autism spectrum disorders ASD has increased exponentially in the last two decades Much of this work has been led by various theorists who claim to have identified processes that hold the key to understanding the condition As a consequence newcomers to the field feel that they have to opt for one or more of the competing approaches and to neglect the remainder as being in some way wrong In fact the different theoretical perspectives are just that different points of view on the same phenomenon each with its own insights to offer This is not to say that understanding ASD in psychological terms is just a matter of choosing a perspective and that all perspectives are of equal value Clearly they are not This book in addition to providing an outline of what current perspectives have to offer also provides a framework to help readers to decide which aspects of psychological research into ASD contribute to our understanding of the field and how these can be integrated in a way that enables research to be taken forward

Langage et cognition humaine Anne Reboul, 2007 La spécificité cognitive des êtres humains par rapport aux autres espèces animales ne fait guère de doute Une question centrale de ce point de vue est celle de l'évolution de cette spécificité On donnera cette question des réponses différentes si l'on considère qu'elle est de nature quantitative une simple question de degré de complexité par exemple ou de nature qualitative certaines capacités cognitives humaines seraient spécifiques l'espèce Dans le premier cas on pourrait arguer de l'augmentation du volume cérébral pour expliquer les modifications intervenues depuis l'ancêtre commun l'homme et aux espèces apparentes grands primates modifications qui ne seraient donc que la conséquence de ce changement purement biologique Dans le deuxième cas il

faudrait supposer que ces capacités spécifiques auraient voulu d'une façon ou d'une autre soit qu'elles aient fait l'objet d'un projet de sélection pour elles-mêmes soit qu'elles soient le résultat d'autres capacités sous-jacentes proprement humaines qui auraient quant elles fait l'objet du processus de sélection Une propriété cognitive qui apparaît clairement humaine est le langage sur l'évolution duquel des hypothèses contradictoires sont défendues aujourd'hui Qui plus est le langage notamment dans ses aspects lexicaux et communicationnels n'est pas isolé des autres mécanismes cognitifs qui interviennent dans sa production et dans sa compréhension et dans le développement desquels l'acquisition linguistique joue une part non négligeable Cet ouvrage propose donc une description des spécificités cognitives humaines discute de leur lien avec le langage ainsi que de l'évolution de celui-ci et de ces spécificités cognitives humaines
