Psychology of Retention Melinde Coetzee, Ingrid L. Potgieter, Nadia Ferreira, 2018-08-30 This book offers a contemporary review of talent retention from the viewpoint of human resource management and industrial organisational psychology. With a practical and relevant perspective it enriches critical knowledge and insight in the psychology of talent retention. It offers interpretation of difficult factors facing organisations such as the conceptualisation of talent, the forecasting of talent demand and supply, external and internal factors that influence talent attraction, development and retention, the alignment between talent management and business strategy. Also covered is the implementation of human resource practices and strategies in response to the needs of different organisational contexts and workforce characteristics. The chapter contributions will not only enrich knowledge and insight in the complex phenomenon of talent retention but also advance new original ways of thinking and researching this critically important area of inquiry. The book is intended for graduate students and researchers as an overview of the topic of talent retention; practitioners will also find it informative.

Blended learning environments to foster self-directed learning Christo van der Westhuizen, Mncedisi C.

Maphalala, Roxanne Bailey, 2023-03-31 This book on blended learning environments to foster self-directed learning highlights the focus on research conducted in several teaching and learning contexts where blended learning had been implemented and focused on the fostering of self-directed learning. Several authors have contributed to the book and each chapter provides a unique perspective on blended learning and self-directed learning research. From each chapter it becomes evident that coherence on the topics mentioned is established. One of the main aspects drawn in this book and addressed by several authors in the book is the use of the Community of Inquiry (CoI) framework when implementing teaching and learning strategies in blended learning environments to foster self-directed learning. This notion of focusing on the CoI framework is particularly evident in both theoretical and empirical dissemination presented in this book. What makes this book unique is the fact that researchers and peers in varied fields would benefit from the findings presented by each chapter, albeit theoretical, methodological or empirical in nature. This in turn provides opportunities for future research endeavours to further the narrative of how blended learning environments can be used to foster self-directed learning.
