*Neoliberal lives* Robert Chernomas,Ian Hudson,Mark Hudson,2019-07-01 This book is about the transformation of America that has occurred over the past thirty five years as capitalist logic has expanded into previously protected spheres of life This expansion has had devastating effects on the potential for human development Looking at how human beings create themselves and their worlds on material foundations of health and the natural environment through work and politics the book chronicles how neoliberalism has limited human potential At a time when neoliberalism s effects are stirring various forms of popular resistance and opposition this is a manifesto of sorts for the range of processes that need to be confronted if human potential is to be freed from the increasingly cramped quarters to which neoliberalism has confined it

**Understanding the Culture** Jeff Myers,2017-03-01 Addressing issues such as gender identity abortion technology and poverty Dr Myers challenges readers to ask How can an authentic Christian worldview provide a compassionate effective witness in culture today Dr Myers first shows readers what they can learn from Christian history and why today s issues might not be as new as they seem Then he takes them through the significant topics that affect them every day offering biblical ideas for conversing with others in an increasingly hostile culture This capstone book to a groundbreaking worldview trilogy equips readers to apply a bold Christian witness to their relationships with loved ones neighbors and colleagues

*Difficult Subjects* Badia Ahad-Legardy,OiYan A. Poon,2023-07-03 *Difficult Subjects* Insights and Strategies for Teaching about Race Sexuality and Gender is a collection of essays from scholars across disciplines institutions and ranks that offers diverse and multi faceted approaches to teaching about subjects that prove both challenging and often uncomfortable for both the professor and the student It encourages college educators to engage in forms of practice that do not pretend that teachers and students are unaffected by world events and incidents that highlight social inequalities Readers will find the collected essays useful for identifying new approaches to taking on the difficult subjects of race gender and sexuality The book will also serve as inspiration for academics who believe that their area of study does not allow for such pedagogical inquiries to also teach in ways that address difficult subjects Contributors to this volume span a range of disciplines from criminal justice to gender studies to organic chemistry and demonstrate the productive possibilities that can emerge in college classrooms when faculty consider identity as constitutive of rather than divorced from their academic disciplines Discussions of race gender and sexuality are always hot button issues in the college classroom whether they emerge in response to a national event or tragedy or constitute the content of the class over a semester long term Even seasoned

professors who specialize in these areas find it difficult to talk about identity politics in a room full of students And many professors for whom issues of racial and sexual identity is not a primary concern find it even more challenging to raise these issues with students Offering reflections and practical guidance the book accounts for a range of challenges facing college educators and encourages faculty to teach with courage and conviction especially when it feels as though the world around us is crashing down upon our students and ourselves *Social Problems* Anna Leon-Guerrero,2018-07-10 Empower your students to become part of the solution The new Sixth Edition of Anna Leon Guerrero s *Social Problems Community Policy and Social Action* goes beyond the typical presentation of contemporary social problems and their consequences by emphasizing the importance and effectiveness of community involvement to achieve real solutions With a clear and upbeat tone this thought provoking text challenges readers to see the social and structural forces that determine our social problems to consider various policies and programs that attempt to address these problems and to recognize and learn how they can be part of the solution to social problems in their own community New to This Edition Many of the social policy discussions including immigration LGBTQ rights the Affordable Care Act and Internet neutrality have been updated to reflect the most recent government actions and debates More recent data and new data sources have been incorporated throughout both in the main narrative and in the Exploring Social Problems features New Voices in the Community subjects on gender work and the economy and war and terrorism appear in several chapters New In Focus topics include Black Lives Matters assault weapons and college drug problems The chapter on gender has been substantially updated with new or expanded coverage of binary cisgender transgender identification gender nonconformity discrimination sexual misconduct on college campuses and the rights of trans and intersex individuals Other new or expanded coverage elsewhere includes economic anxiety robotization in the workplace white nationalists feminist theories about race fake news net neutrality community policing gentrification and segregation in U S cities and the immigration and environmental policies of the Trump administration

Neuroscience, Learning and Educational Psychology María Jesús Luque Rojas,Eduardo Blanco Calvo,María Teresa Martín-Aragoneses,2022-08-25 Marine Ecosystem Restoration (MER) - Challenges and New Horizons Brian Silliman,Avigdor Abelson,Christine Angelini,Gesche Krause,Megan Irene Saunders,Tjisse Van Der Heide,2023-10-23 Worldwide marine ecosystems have been lost and degraded due to anthropogenic disturbances For example oyster reefs have declined by at least 85% coral reefs by 19% seagrasses by 29% North American salt marshes by 42% and mangroves by 35% from the early 19th century Deepwater reefs and deep sea vents are not immune and have also been reduced in extent in many areas Factors driving these losses include habitat destruction pollution invasive species overfishing trawling mining and more recently climate change effects such as ocean warming species range changes and acidification These habitat declines are occurring at a time when marine waters are being used at or near their maximum productive capacity to meet the contemporary needs of an ever increasing human population Because coastal and marine ecosystems generate some of

the richest biodiversity hotspots on Earth and provide critical ecosystem services including storm protection fisheries production and carbon storage over 1 billion US dollars have been spent globally in an attempt to halt and reverse observed declines Early conservation efforts aimed at protecting these valuable and threatened habitats focused on reducing human impacts and physical stressors However with habitat degradation continuing and sometimes increasing in rate it is now clear conservation alone will not be sufficient to protect and reestablish coastal ecosystems Habitat restoration although in existence for many decades has recently been elevated as a new primary strategy to stem and even reverse coastal habitat loss The call for increasing investment in restoration efforts has emerged with significant advances in propagule rearing and dispersion of habitat forming organisms e g oysters seagrasses corals In addition restoration resources are increasingly allocated by governments and or large corporations with the aim to for example fix past landscape engineering efforts that had unintended environmental consequences Such investments are being made to i provide jobs for those unemployed during economic downturns ii restore ecosystems destroyed by natural disasters and stressors iii increase coastal defense in response to increased frequency of intense storms and or iv compensate for pollution and development driven habitat degradation Conservation practitioners have traditionally been skeptical to invest heavily in restoration at large scales because of the high cost per area 10 000 5 000 000 US ha for coastal vs 500 5 000 US ha for terrestrial systems to replant coastal ecosystems and or the high chance that the restored ecosystems will not live long e g outplanted corals For restoration to be effective and employed as a primary method of coastal conservation at relevant scales we must improve its efficiency lower costs and rapidly share and incorporate advances One crucial step will be to identify when and where restoration attempts have been carried out according to state of art ecological theory and gauge their success Another is generating synthesis studies that focus both within and across ecosystems to identify efficiencies adaptations and innovations Work that shows theoretical and methodological innovations in specific ecosystems as well as across systems will be critical to pushing all fields of MER forward Although there is rapidly increasing interest and investment the field of marine ecosystem restoration is just beginning to undergo synthesis Therefore the aim of this Research Topic is to bring together research contributions to help address this synthesis need provide a spotlight for recent innovations enhance our understanding of successful methods in marine ecosystem restoration and promote integration of ecological sociological and engineering theory into restoration practices
