MAKING PREDICTIONS

LEARNING TO FLY

Katie was such a cute little caterpillar. She spent her days crawling along the bright green leaves in the garden, munching and crunching as she went. One day, Katie decided it was time for a change. So she wove a cocoon around herself, and she went to sleep. When she woke up, she had become a beautiful butterfly. But there was one big problem. Katie didn't know how to fly. She had never had wings before and, she didn't know how to use them! But she had to learn. So she took a step, and she started to flap her wings.

AN UNLIKELY FRIENDSHIP

Lenny the spider had no friends. All the other bugs just saw him as a scary spider. They would run in the opposite direction whenever they saw Lenny coming. But Lenny knew he was different from the other spiders. He just wanted a friend, someone to talk to and play with. One day, a fly got caught up in his web. The fly saw Lenny coming and wriggled and jiggled, trying to escape.

The Work Sampling System ,2001 *Learning to Predict and Predicting to Learn* Thomas DeVere Wolsey,Douglas Fisher,2009 Featuring practical instructional routines that are clearly linked to cognitive strategies students need to make sense of text this book combines a rationale written from the perspective of current research that supports the use of the strategy or instructional routine with clear step by step directions and multiple examples from the classroom experiences of teachers across the United States These experiences appear as boxed features that are easily identifiable by the reader The text is written in such a way that readers may start on page one and work through the end of the book or use the book as a reference for their own practice or as an inservice tool Each cognitive strategy is linked via convenient matrices to the instructional routines that promote precision thinking on the part of students Features Differentiation between cognitive strategies for students and instructional routines teachers might use Provides teachers and preservice teachers with a means to think about the tools they use to promote cognitive proficiency on the part of students Often strategies are used a catch all term that does not clarify the difference between what teachers do and how students incorporate learn from those routines Boxed features Real teachers explain how they have used the tools discussed in the book Provides teachers with examples to which they may be able to relate Instead of an isolated example the voices of classroom teachers will explain how they have implemented instructional routines or promoted cognitive strategies for their students Sound rationale coupled with step by step procedures Teachers often like to know what works but many texts ignore their need and desire to know why a strategy or routine works This text links rationale with tools so that readers will be able to explain why they are using a routine or assisting students to use cognitive tools to understand how they might think more precisely about the books they read Theme Prediction Prediction is a popular request teachers make of their students but often teachers lack sufficient experience or rationale to know how students might use prediction to increase precision in

thinking about books and other texts they read Approach Combination of both theoretical and research with useful tools students and teachers can implement tomorrow Many books take either a theoretical approach with little classroom application provided or a practical approach that does not help teachers understand why a given tool is useful and under what circumstances This book combines the best of both approaches to help teacher readers understand why a strategy or routine is worth the instructional time that might be devoted to it Setting Performance Standards for Student Achievement ,1993 Learning in Two Worlds Bertha Pérez, Maria E.
