

Dichotomous Key for Animal Classification

Your instructor will demonstrate how to use a dichotomous key. A simple dichotomous key to some members of the animal kingdom is included in this exercise. Begin at step one of the key for each specimen that has been set up in the demonstration area of the lab. Identify the name of the organism at each station. Remember, the purpose of this identification is to become familiar with the classification characteristics of the organism you are identifying.

Number a blank sheet of paper as directed by your instructor. When you have determined the name of the organism, write the underlined name (from the key) opposite the appropriate number on your sheet.

You may begin your work at any station and proceed to any available station thereafter; just be careful to place your answer at the appropriate number on your answer sheet.
