Obstetrics and Gynecology: Maintenance of Knowledge, An Issue of Obstetrics and Gynecology Clinics Janice L.

Bacon, Paul G. Tomich, 2017-05-23 The acquisition and implementation of new findings for clinical care in obstetrics and gynecology is at a more rapid pace than ever before. More understanding of the pathophysiology of disease coupled with improved screening technology and genetic information requires physicians to constantly update their knowledge base and familiarize themselves with guidelines and advances in techniques as well as question old euphemisms. Medical specialties including obstetrics and gynecology have moved from board certification as a solitary achievement to maintaining current knowledge a continuous lifelong learning process. This issue of Obstetrics and Gynecology Clinics is dedicated to clinical care for patients with evidence based recommendations, state of the art advice and updates. Articles are specifically devoted to Contraception, menarche to menopause, Vaginitis beyond symptoms, Abnormal uterine bleeding, Recognition and therapeutic options for malignancy of the cervix and uterus, Gestational diabetes, Diagnosis, classification and clinical care, Hypertensive disorders in pregnancy, Obstetric emergencies, Shoulder dystocia and postpartum hemorrhage, Prenatal diagnosis tools and tests for screening, Clinical recognition and screening for common breast disorders and malignancy and Recognizing and managing common urogynecologic disorders. The Black Woman's Breast Cancer Survival Guide Cheryl D.

Holloway, 2017-07-14 Breast cancer is reaching epidemic levels especially among black women. This survival guide provides tools that women, black women in particular, can use to identify and combat this all too common threat. This what you need to know guide is unique in its common sense, laywoman's approach and particular relevance to women of color. Its premise is simple: ignorance and lack of education about breast cancer signs and symptoms are still all too prevalent among black women. Many women are not informed about resources available for early detection, screening and are not referred for mammography screening. They may also receive significantly delayed treatment, especially black women. For those reasons and more, black women with or at risk for breast cancer need an advocate who speaks for them and tells them the truth. They have that advocate in Cheryl Holloway, PhD, and in this book. A breast cancer survivor and cancer researcher, Dr. Holloway draws on her personal experience and research to offer something far different than the usual medical oncological works. Her book provides support, current information and practical advice for confronting and beating the disease. The book is divided into four parts. Dealing with the Basics explains how breast cancer hits black women harder and discusses the types of breast cancer they may develop with an emphasis on the most dangerous. The second section offers practical information such as how screenings work and the meaning of various breast cancer tests. Part three describes treatments including surgery, radiation therapy, chemotherapy, hormone therapy, combined therapy and other options. The final section describes how to stay vigilant after the cancer is gone and also discusses other forms of cancer for which black women are at risk, such as lung cancer, colon cancer and cervical cancer. **Davis's Comprehensive Manual of Laboratory and Diagnostic Tests With**
