presentation of the various aspects of financial management and management accounting is a highlight of this text. Focusing on the core areas of financial management, basic concepts of finance, sources of finance, capital structure theories and planning, dividend policies, investment decisions, portfolio management and working capital management, as well as the areas of management accounting, changes in financial position, financial statement analysis and inter-firm comparison, budgetary control and standard costing and cost information and management decisions, the book also delves on the contemporary topics such as financial environment, corporate governance and international financial management in detail. In addition, it contains a number of case studies on various areas of finance and management accounting. The current edition has been thoroughly revised, keeping in view contemporary developments in the literature and applicable provisions of the Companies Act 2013. Apart from updating the case studies, new cases have been added to support the relevance and quality of discussion. Intended primarily for postgraduate students of commerce (M.Com) and management (MBA) with finance specialization, the book will also be highly useful for undergraduate students of Commerce and Management, students of professional courses such as CA and ICWA, as well as professionals in the fields of financial management and management accounting. The present treatise has been recommended by many Colleges, Management Institutes and Universities in India for their respective postgraduate and undergraduate commerce and management courses.
