Corporate Social Responsibility and Shell in Ireland

Francis O'Donnell, 2011-07-12 Francis O'Donnell is an ecologist and business graduate from the Republic of Ireland His current area of interest is the development of Corporate Social Responsibility (CSR) He considers culture a serious impediment to CSR's potential to reduce social and environmental conflict in an Irish context He is acutely aware that Multinational Corporations and national Governments often overlook stakeholder inclusiveness due to self interest However he argues that CSR offers those with business interests social interests and environmental interests a space to come together and adopt better models to reduce conflict His first book *Corporate Social Responsibility and Shell in Ireland: A Thin Veneer* evaluates Shell's stated commitments to society and the environment in Ireland It also explores how weak regulation and political facilitation may have influenced Shell to act as poor corporate citizens there He believes that the absence of proper frameworks to robustly evaluate an organisation's commitment to wider society may result in some organisations adopting an *à la carte* attitude to CSR in general He points to the lack of NGO's in Ireland to monitor political processes and regulation If the status quo remains he believes that a platform currently exists whereby Multi National Corporations especially those in the petrochemical industry may perceive Ireland as a soft option to exploit business interests at the expense of key stakeholder groups and wider society as a whole This book is useful in provoking discussion on these issues at undergraduate postgraduate and executive levels It can be used in courses on leadership corporate responsibility ethics public policy business and organizational behaviour It is particularly suitable to classes which cover leadership ethical decision making stakeholder engagement and change management Key themes that emerge throughout the book include community engagement the meaning of consultation with a community the nature of leadership the importance of planning and

ultimately the meaning of responsible behaviour in both a corporate and government context The book deals with issues of relative power and accountability and explores the boundaries of a company's responsibilities to a community fractured by its presence
