Financial Crisis GFC was a turning point for G SIBs many of which contributed to the outbreak and severity of this downturn The unfolding of the GFC also revealed flaws and omissions in the legal framework applying to financial entities In the context of G SIBs it clearly demonstrated that the legal regimes both in the USA and in the EU grossly ignored the specific character of these institutions and their systemic importance complexity and individualism As a result of this omission these megabanks were long treated like any other smaller banking institutions Since the GFC legal systems have changed a lot on both sides of the Atlantic and global and national lawmakers have adopted new rules applying specifically to G SIBs to reduce their threat to financial stability This book explores whether the G SIB specific regulatory frameworks are adequately tailored to their individualism in order to prevent them from exploiting overly general rules as they did during the GFC Analyzing the specific character and individualism of G SIBs in relation to their history normal functioning as well as their operations during the GFC this book discusses transformation of banking systems and the challenges and opportunities G SIBs face such as Big Tech competitors climate related requirements and the COVID 19 pandemic Taking a multidisciplinary approach which combines financial aspects of operations of G SIBs and legal analysis the book describes G SIB oriented legal frameworks of the EU and the USA and assesses whether G SIB individualism is adequately reflected analyzing trends in supervisory action when it comes to discretion in the G SIB context all in order to contribute to the ongoing discussions about international banking law its problems and potential remedies to such persistent flaws
