Debating Yoga and Mindfulness in Public Schools Candy Gunther Brown, 2019-03-27 Yoga and mindfulness activities with roots in Asian traditions such as Hinduism or Buddhism have been brought into growing numbers of public schools since the 1970s While they are commonly assumed to be secular educational tools Candy Gunther Brown asks whether religion is truly left out of the equation in the context of public school curricula An expert witness in four legal challenges Brown scrutinized unpublished trial records informant interviews and legal precedents as well as insider documents some revealing promoters of Vedic victory or stealth Buddhism for public school children The legal challenges are fruitful cases for Brown s analysis of the concepts of religious and secular While notions of what makes something religious or secular are crucial to those who study religion they have special significance in the realm of public and legal norms They affect how people experience their lives raise their children and navigate educational systems The question of religion in public education Brown shows is no longer a matter of jurisprudence focused largely on the establishment of a Protestant Bible or nonsectarian prayer Instead it now reflects an increasingly diverse American religious landscape Reconceptualizing secularization as transparency and religious voluntarism Brown argues for an opt in model for public school programs

Exploring STEM Environments that Broaden Participation Tyrslai Williams, Renã A. S. Robinson, Zakiya S.

Wilson-Kennedy,2025-09-16 Creating spaces conducive for all students pursuing degrees in STEM is a constant conversation in higher education Studies establish the need for broad participation in STEM and the barriers in place that prevent matriculation through critical junctures Through these studies several suggestions and recommendations suggest supporting students through advising mentoring and research experience Very little is discussed about the tools and strategies needed to enhance students own development of self efficacy and self identity through mentorship in formal environments like the lab classroom and departments but also in informal STEM environments like bridge programs organizational involvement and mentoring groups While the environments seem very different the mission of dynamic approaches to student progression is apparent Furthermore understanding how the support evolves at each critical juncture is critical to the way in which the future of STEM will advance

Food and Cooking Skills Education Anita Tull,2018-01-29 Food and Cooking Skills Education FCSE is a complex mix of policy and practicality educational theory and pedagogy classroom and government policy This book shows how FCSE has been at the centre of a tussle between education and policy for decades It reviews how FCSE has grappled with various significant issues of concern that threaten to marginalise it and pose problems for educational practicalities as expectations are increased but resources are squeezed It assesses the debate about the significance and importance of acquiring practical food and cooking skills in a society where the purchase of ready made food has become commonplace and public knowledge of where our food comes from is noticeably lacking This has contributed to the escalating incidence of diet related diseases and the attendant cost to society and threatened environmental sustainability In turn governments have reacted by proposals to make practical cooking skills a statutory National Curriculum subject as part of the armoury for tackling such costs Based on detailed research conducted across England and Wales as well as comparisons with thirty five other countries or states the author makes recommendations for policy to manage this challenge facing contemporary society

Taking Back Philosophy Bryan W. Van Norden,2017-12-05 Are American colleges and universities failing their students by refusing to teach the philosophical traditions of China India Africa and other non Western cultures This biting and provocative critique of American higher education says yes Even though we live in an increasingly multicultural world most philosophy departments stubbornly insist that only Western philosophy is real philosophy and denigrate everything outside the European canon In Taking Back Philosophy Bryan W Van Norden lambastes academic philosophy for its Eurocentrism insularity and complicity with nationalism and issues a ringing call to make our educational institutions live up to their cosmopolitan ideals In a cheeky agenda setting and controversial style Van Norden an expert in Chinese philosophy proposes an inclusive multicultural approach to philosophical inquiry He showcases several accessible examples of how Western and Asian thinkers can be brought into productive dialogue demonstrating that philosophy only becomes deeper as it becomes increasingly diverse and pluralistic Taking Back Philosophy is at once a manifesto for multicultural education an accessible introduction to Confucian and Buddhist

philosophy a critique of the ethnocentrism and anti intellectualism characteristic of much contemporary American politics a defense of the value of philosophy and a liberal arts education and a call to return to the search for the good life that defined philosophy for Confucius Socrates and the Buddha Building on a popular New York Times opinion piece that suggested any philosophy department that fails to teach non Western philosophy should be renamed a Department of European and American Philosophy this book will challenge any student or scholar of philosophy to reconsider what constitutes the love of wisdom
