Fundamentals of Applied Multidimensional Scaling for Educational and Psychological Research Cody S. Ding,2018-04-09 This book explores the fundamentals of multidimensional scaling MDS and how this analytic method can be used in applied setting for educational and psychological research The book tries to make MDS more accessible to a wider audience in terms of the language and examples that are more relevant to educational and psychological research and less technical so that the readers are not overwhelmed by equations The goal is for readers to learn the methods described in this book and immediately start using MDS via available software programs The book also examines new applications that have previously not been discussed in MDS literature It should be an ideal book for graduate students and researchers to better understand MDS Fundamentals of Applied Multidimensional Scaling for Educational and Psychological Research is divided into three parts Part I covers the basic and fundamental features of MDS models pertaining to applied research applications Chapters in this section cover the essential features of data that are typically associated with MDS analysis such as preference ration or binary choice data and also looking at metric and non metric MDS models to build a foundation for later discussion and applications in later chapters Part II examines specific MDS models and its applications for education and psychology This includes spatial analysis methods that can be used in MDS to test clustering effect of items and individual differences MDS model INDSCAL Finally Part III focuses on new applications of MDS analysis in these research fields These new applications consist of profile analysis longitudinal analysis mean level change and pattern change The book concludes with a historical review of MDS development as an analytical method and a look to future directions *Community Series in Mental Illness, Culture, and Society: Dealing with the COVID-19 Pandemic, volume VIII* Mohammadreza Shalbafan,Samer El Hayek ,Renato de Filippis,2024-06-21 The COVID 19 outbreak has impacted many areas of our lives including mental health Lockdown and physical distancing measures have been one major effective intervention to counter the spread of the virus and reduce the impact of the disease However they have negatively impacted mental well being and behaviors either triggering the onset of new psychiatric symptoms and diseases or amplifying pre existing ones The pandemic and lockdown measures have also been associated with reduced access to treatment and facilities all over the world further worsening mental health outcomes The impact on mental health although universal varied between nations Cultural and societal variables including norms values religion and stigma have played an important role in shaping COVID 19 related mental health symptoms including anxiety depression grief psychosis and addiction These sociocultural factors have also molded how mental health interventions are tailored and provided Highlighting the intertwining relationship between the pandemic mental health and
