Dying in America Institute of Medicine, Committee on Approaching Death: Addressing Key End-of-Life Issues, 2015-03-19 For patients and their loved ones no care decisions are more profound than those made near the end of life Unfortunately the experience of dying in the United States is often characterized by fragmented care inadequate treatment of distressing symptoms frequent transitions among care settings and enormous care responsibilities for families According to this report the current health care system of rendering more intensive services than are necessary and desired by patients and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families Dying in America is a study of the current state of health care for persons of all ages who are nearing the end of life Death is not a strictly medical event Ideally health care for those nearing the end of life harmonizes with social psychological and spiritual support All people with advanced illnesses who may be approaching the end of life are entitled to access to high quality compassionate evidence based care consistent with their wishes Dying in America evaluates strategies to integrate care into a person and family centered team based framework and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families The findings and recommendations of this report will address the needs of patients and their families and assist policy makers clinicians and their educational and credentialing bodies leaders of health care delivery and financing organizations researchers public and private funders religious and community leaders advocates of better care journalists and the public to provide the best care possible for people nearing the end of life

Management Consultancy and the British State Antonio E. Weiss, 2018-10-26 This book traces the emergence and development of the relationship between management consultancies and the British state It seeks to answer three questions why were management consultants brought into the machinery of the state how has state power been impacted by bringing profit seeking actors into the machinery of the state and how has the nature of management consultancy changed over time The book demonstrates the role consultants played in major developments in the postwar period Specific case studies interrogate how consultancies influenced the policy fields of health service reform and social security benefits This book will redefine debates amongst business historians and historians of the postwar British state about the nature of management consultancy and public sector reform
