and the role of the human mirror neuron system? Analia Arevalo, Juliana Baldo, Fernando González-Perilli, Agustin Ibanez, 2016-03-09 In recent years work surrounding theories of embodiment and the role of the putative mirror neuron system MNS in humans has gained considerable attention If humans have developed a network of neurons that fire in response to other beings actions as has been shown in macaques this system could have vast implications for all kinds of cognitive processes unique to humans such as language learning empathy and communication in general The goal of tapping into and understanding such a system is a fascinating yet challenging one One form of embodiment embodied linguistics suggests that the way we process linguistic information is linked to our physical experience of the concept conveyed by each word The interaction between these cognitive systems i e language and motor processing may occur thanks to the firing of neurons making up the MNS The possible interdependence between different cognitive systems has implications for healthy as well as pathological profiles and in fact work in recent years has also explored the role of embodiment and or the MNS in clinical populations such as stroke Parkinson s Disease Alzheimer s Disease and Autism among others Research on

embodiment and or the MNS has been approached with a number of different methodologies but the results obtained with these different methodologies have not been entirely consistent generating doubts regarding the theories The question has been raised as to what this line of inquiry can gain from the types of evidence contributed by functional neuroimaging methods carried out with healthy volunteers versus behavioral or lesion symptom mapping methods employed with neurologically compromised individuals Of particular interest are the clinical applications of this line of research If indeed a system exists which reflects a tight link between for example the human language and motor systems then the obvious challenge is to tap into this system to create useful therapies that can provide rehabilitation where damage has occurred This Research Topic brought together work conducted with healthy and patient populations using several behavioral and imaging techniques as well as insightful commentaries and opinion pieces We believe the combined work of the participating authors is an important contribution to this intriguing line of research and an excellent point of reference for future work Catalog of Copyright Entries, Third Series ,1953 The record of each copyright registration listed in the Catalog includes a description of the work copyrighted and data relating to the copyright claim the name of the copyright claimant as given in the application for registration the copyright date the copyright registration number etc *PASCAL.* ,1991 August 2023 - Surplus Record Machinery & Equipment Directory Tom Scanlan, SURPLUS RECORD is the leading independent business directory of new and used capital equipment machine tools machinery and industrial equipment listing over 110 000 industrial assets since 1924 including metalworking and fabricating machine tools lathes cnc equipment machine centers woodworking equipment food equipment chemical and process equipment cranes air compressors pumps motors circuit breakers generators transformers turbines and more Over 1 100 businesses list with the SURPLUS RECORD August 2023 issue Vol 100 No 8 *National Stockman and Farmer* ,1913
