Luanar Results2015 To 2016

Fred M. Hayward

Luanar Results 2015 To 2016:

Prospects for quinoa adaptation and utilization in Eastern and Southern Africa Maliro, M.F.A., Abang, M.M., Mukankusi, C., Lung'aho, M., Fenta, B., Wanderi, S., Kapa, R., Okiro, O.A., Koma, E., Mwaba, C., Isse, M.M. and Bazile, D., Food and Agriculture Organization of the United Nations, 2021-01-22 Quinoa *Chenopodium quinoa* Willd is an emerging crop in the world with great potential to contribute to Africa's food and nutritional security. The increased popularity of quinoa in the last few years is attributed to the impact of activities carried out within the framework of the International Year of Quinoa IYQ2013 which helped greatly to raise awareness on the crop's multiple nutritional benefits and its expanding cultivation globally. The Food and Agriculture Organization (FAO) which championed the IYQ2013 has worked with developing countries in Africa which are grappling with food and nutrition insecurity to introduce and promote cultivation of quinoa. Production and utilization of quinoa is expected to significantly reduce food and nutrition insecurity and help farming communities adapt to climate change. FAO implemented a Technical Cooperation on quinoa titled Technical Assistance for the Strengthening of the Food System of Quinoa TCP/SFE 3406 implemented in 2014 to 2015. This project was designed to support the institutional capacities of seven countries including Djibouti, Ethiopia, Kenya, Somalia, South Sudan, Uganda, and Zambia in the production, evaluation, management, utilization, and marketing of Quinoa under diverse farming systems and agro-ecological zones. The project was implemented and led by the FAO Subregional office for Eastern Africa. SFE Quinoa evaluation trials that were conducted across multiple sites in the participating countries served as pilot adaptability studies for the crop. This technical paper presents key technological, institutional, and policy considerations for the successful introduction, adaptation, and utilization of quinoa in Africa.

An overview on local alternative ingredients, aquafeed supply and feeding management in selected African countries Food and Agriculture Organization of the United Nations, Garcia Sampaio, F. (ed.); Hasan, M.R. (ed.); El-Sayed, A-F.M. (ed.), Aquaculture plays a vital role in enhancing food security in Africa but faces challenges in the fed aquaculture sector particularly in accessing and producing high quality aquafeeds. To address this, FAO organized the Expert Workshop on Local Alternative Ingredients, Aquafeed Supply and Feeding Management in Egypt in 2023. Experts and stakeholders from nine African countries (Cameroon, Egypt, Ghana, Kenya, Malawi, Nigeria, Uganda, the United Republic of Tanzania, and Zambia) participated alongside representatives from governments, academia, development agencies, the private sector, and farming communities. Pre-workshop questionnaires informed national reports on feed ingredient supply, feed manufacturing, and feeding management practices. These reports, along with workshop discussions, form the basis of this technical document comprising nine country analyses and a regional synthesis. Common challenges identified include limited access to alternative feed ingredients, poor feed preparation and storage practices, inadequate monitoring of on-farm feeding, lack of investment for small-scale producers, low technical capacity among farmers, poor feed quality, and weak regulatory frameworks. The synthesis report recommends key actions

stabilizing feed ingredient supply and costs promoting training for feed producers and farmers improving on farm feed and water quality management enhancing data collection and analysis expanding access to finance and storage facilities and strengthening collaboration among stakeholders These measures aim to build a more efficient sustainable and resilient aquaculture sector across the region **Transforming Higher Education in Asia and Africa** Fred M.

Hayward,2020-03-01 Drawing on over fifty years of on the ground experience Fred M Hayward s Transforming Higher Education in Asia and Africa analyzes change processes in higher education in eight Asian and African countries The twelve cases range from the push to upgrade and transform higher education in Afghanistan in the midst of a war to the successful struggle against apartheid in South African institutions as well as thwarted efforts in Sierra Leone and Madagascar Providing both practical lessons learned and hope for communities globally Hayward demonstrates that higher education change and even transformation which is more fundamental and structural can occur even in the most difficult environments Successful transformation requires well crafted strategic and budget plans with careful implementation monitoring and effective leadership at multiple levels Yet also critical are a commitment to human development a desire for freedom and belief in democracy and recognition that high quality higher education is essential to national development **Climate Impacts on**

Agricultural and Natural Resource Sustainability in Africa Bal Ram Singh,Andy Safalaoh,Nyambilila A. Amuri,Lars Olav Eik,Bishal K. Sitaula,Rattan Lal,2020-03-17 This book discusses knowledge based sustainable agro ecological and natural resource management systems and best practices for sustained agricultural productivity and ecosystem resilience for better livelihoods under a changing climate With a focus on agriculture in Africa the book assesses innovative technologies for use on smallholder farms and addresses some of the key Sustainable Development Goals to guide innovative responses and enhanced adaptation methods for coping with climate change Contributions are based on Capacity Building for Managing Climate Change in Malawi CABMACC a five year program with an overall goal to improve livelihoods and food security through innovative responses and enhanced capacity of adaptation to climate change Readers will discover more about sustainable crop production climate smart agriculture on farm energy supply from biogas and the potential of soil carbon sequestration in crop livestock systems
