Laboratory Manual for the Processes of Life Biology Dept Holyoke,2023-05-09

This lab manual is designed for first semester biology students that are studying cellular processes The labs were designed to help introduce students to many of the major ideas while also giving them practice with both the scientific method and laboratory tools With these labs we have attempted to give students enough guidance that they can maneuver through the labs without too much frustration but still have to do some designing of experiments so that the labs aren t all cookie cutter We also tried to add in some review exercises within the lab to test the student s ability to go back over what they had just been studying as a form of assessment There are also review questions that the instructor can use as a quiz or as a study guide for a quiz
