Today's music theory instructors face a changing environment, one where the traditional lecture format is in decline. The Routledge Companion to Music Theory Pedagogy addresses this change head-on, featuring battle-tested lesson plans alongside theoretical discussions of music theory curriculum and course design. With the modern student in mind, scholars are developing creative new approaches to teaching music theory, encouraging active student participation within contemporary contexts such as flipped classrooms, music industry programs, and popular music studies. This volume takes a unique approach to provide resources for both the conceptual and pragmatic sides of music theory pedagogy. Each section includes thematic anchor chapters that address key issues, accompanied by short topics chapters offering applied examples that instructors can readily adopt in their own teaching. In eight parts, leading pedagogues from across North America explore how to most effectively teach the core elements of the music theory curriculum: Fundamentals, Rhythm and Meter, Core Curriculum, Aural Skills, Post-Tonal Theory, Form, Popular Music, Who, What, and How We Teach. A broad musical repertoire demonstrates formal principles that transcend the Western canon, catering to a diverse student body with diverse musical goals. Reflecting growing interest in the field and with an emphasis on easy implementation, The Routledge Companion to Music Theory Pedagogy presents strategies and challenges to illustrate and inspire in a comprehensive resource for all teachers of music theory. *Expanding the Canon* Melissa Hoag, 2022-12-30. Directly addressing the underrepresentation of Black composers in core music curricula, *Expanding the Canon: Black Composers in the Music Theory Classroom* aims to both demonstrate why diversification is badly needed and help faculty expand their teaching with practical, classroom-oriented lesson plans that focus on teaching music theory with music by Black composers. This collection of 21 chapters is loosely arranged to resemble a typical music theory curriculum, with topics progressing from basic to advanced and moving from fundamentals (diatonic harmony and chromatic harmony) to form, popular music, and music of the twentieth and twenty-first centuries. Some chapters focus on segments of the traditional music theory sequence, while others consider a single style or composer. Contributors address both methods to incorporate the music of Black composers into familiar topics and ways to rethink and expand the purview of the music theory curriculum. A foreword by Philip Ewell and an introductory narrative by Teresa L. Reed describing her experiences as an African American student of music set the volume in wider context. Incorporating a wide range of examples by composers

across classical jazz and popular genres this book helps bring the rich and varied body of music by Black composers into the core of music theory pedagogy and offers a vital resource for all faculty teaching music theory and analysis
