Rudnick, Ronald L. Shubkin, 1999-03-10 Offers state of the art information on all the major synthetic fluids describing established products as well as highly promising experimental fluids with commercial potential This second edition contains chapters on polyinternalolefins polymer esters refrigeration lubes polyphenyl ethers highly refined mineral oils automotive gear oils and industrial gear oils The book also assesses automotive industrial aerospace environmental and commercial trends in Europe Asia South America and the US **Advances in Lubricant Additives and Tribology** S.P. Srivastava, 2009-03-15 It is understood that hydrogen is going to be the future clean fuel which can either be used in fuel cells or directly in engines This will mean that there will be challenges to the lubricant developers to meet the requirements of new engines using hydrogen as fuel where there would be no soot no sulphur and no carbon deposits from fuels Lubricating base oil technology has changed during the last decade API group III oils produced through hydro processes and GTL base oils are free from sulphur and nitrogen and have high viscosity index Therefore the engine oil formulations would have to change considerably in the near future The use of biodegradable lubricants mainly based on vegetable oils or genetically modified vegetable oils would increase in the agricultural and forest sector This book incorporates up to date

information on these important subjects which shall enable the readers to understand the dynamics of lubricant additive technology and tribology The book will be useful to all those engaged in education and research in the field of lubricant additives and lubricants
