

3. Connect positive (+) cable to solenoid battery terminal.
4. Connect negative (–) cable to starter body.
5. Attach current gun to positive (+) cable.
6. Use a jumper wire to briefly connect solenoid battery terminal to solenoid switch terminal. Starter should engage and run.
7. Read and record starter amperage and rpm.

Results:

- If solenoid "clicks" or chatters and motor does not turn, replace solenoid.
- If pinion gear engages and motor doesn't turn, repair or replace starter motor.
- If starter engages and runs, but amperage is **more than 50 amps at 6000 rpm**, repair or replace starter.
- If free-running rpm is **less than 6000 rpm**, repair or replace starter.

NOTE: Starter repair is limited to brushes, end caps, and starter drive. Fields in starter are permanent magnets and are not serviceable. If housing or armature are damaged, replace starter.

Disassembly/Assembly

1. Separate pinion stopper halves to remove retaining clip to remove starter drive.
2. Inspect parts for wear or damage. Replace parts as necessary.
3. Test solenoid, starter armature and brushes. (See Inspection/Test procedures.)

Assembly is done in the reverse order of disassembly.

- Apply a very light coating of multipurpose grease to:
 - Sliding surfaces of armature and solenoid shift lever pivots.
 - Armature shaft spline.
 - Points where shaft contacts cover.
- Always replace retaining clip with new one.
