Teacher Evaluation     Everyone at the Table Ellen Behrstock-Sherratt, Allison Rizzolo, Sabrina W. Laine, Will Friedman, 2013-05-01 A proven method for working with teachers to design better evaluations There is no magic formula for successfully designing a teacher evaluation system However there is abundant evidence that suggests involving teachers in the process will reduce the likelihood of opposition gridlock and reform failure Everyone at the Table provides materials to genuinely engage teachers in the evaluation process The book is a research based and field tested practical guide for school leaders With this resource educators will have the tools they need to develop meaningful teacher evaluations Offers a collaborative approach to designing teacher evaluations Includes a companion web based resource with video This research based program outlines a solid plan for improving teacher effectiveness through evaluation reform     *Teacher Evaluation* Ann Elizabeth McClure, 2008 This qualitative research study concerns teacher evaluation in the early years of teaching The small number of participants represents a wide range of roles in teacher evaluation in both the pre service context and the beginning in service context The data was gathered through face to face interviews focus groups and written documentation sources used in teacher evaluation in both contexts The study provides a written account from various perspectives about a very personal and emotional topic in education teacher evaluation The questions asked in the face to face interviews and focus groups followed a self designed parallel framework of questioning to purposefully explore evaluation of the practicum experience during teacher education and evaluation of teacher performance during the initial year of teaching I tape recorded and transcribed all the data which I transferred into data base software to conduct some of the analysis As well constant comparative analysis techniques such as close reading and rereading coding displays data queries relistening of tapes with the printed transcripts to make connections and diagrams supported the data analysis to find answers to the questions guiding the study Although the participants in the study acknowledge the intent of the teacher evaluation processes in both pre and beginning in service contexts has merit in actual practice it appears to be problematic Teacher evaluation according to the participants in this study appears to be more of a technical exercise than a valuable function to promote teacher growth and development Aside from the formative feedback received by the pre service teacher participants little about the process was deemed valuable for teacher growth and development Specific concerns included the artificiality of the process in both contexts the lack of candid reporting on the summative reports and the difference between pre service to in service of formative evaluation methods Teacher evaluation practices in Ontario notably in service have changed since this study was conducted It remains unclear whether these changes will translate into a different outcome through the teacher evaluation process More research is required to continue the discussion this study begins in the province of Ontario If the province is concerned about teacher growth and development to support improved student achievement in the classroom it is important that the teacher evaluation process is aligned through the transition to teaching As well it is important that the time and energy spent on teacher evaluation does in fact lead to improved teacher quality to support

student achievement in the classroom Otherwise as was detailed by the participants in this study teacher evaluation will continue to be characterized as a classroom observation followed by a written report that simply serves a purpose of accountability

**Defensible Teacher Evaluation** Rick Stiggins, 2014-03-11 Meaningful teacher evaluation starts with visible student growth Annual standardized test scores cannot provide evidence of student growth needed to evaluate teacher performance But consider student growth in the form of evidence derived from classroom assessment and you're on to something This revolutionary book helps you bring classroom assessment to bear for real school improvement with A plan for teacher evaluation based on dependable evidence of student growth Strategies for improving the assessment literacy of teachers and school leaders Five steps for developing and implementing productive local district assessment systems Practical tools that teachers and their evaluators can put to use immediately

**Teacher Evaluation as a Growth Process** Dianna Whitlock Ed.D., 2020-05-17 While this book focuses on evaluation of teachers it is actually a book about fostering professional growth and improvement In our writings we provide support for teacher evaluation as a growth exercise and show how creating a feedback rich culture in a school nurtures this process The underlying theme is that evaluation data be utilized to drive professional development and growth leading to reduction of teacher attrition and improved learning for students At the heart of this feedback rich culture is the observation and evaluation process For evaluation to be an exercise in professional growth data must be collected and reviewed with the teacher so the administrator can provide support with transparency This culture also places an urgency on the teacher

evaluation process that has been historically absent We include practical tips for creating this culture and maximizing opportunities for feedback and examine traditional methods of evaluation and why these fell short in giving meaningful feedback to teachers We will share innovative trends in teacher evaluation and how these can be utilized to drive teacher growth ultimately leading to improved student achievement As our nation faces a teacher shortage and increasing teacher attrition rate it is more vital than ever to retain and develop those currently practicing in the classroom We highlight a research study by the author of teachers who have been evaluated consistently over a three year period This is more than a how to book with a list of how to best implement the teacher evaluation process in your school Instead it is a how book with best practices from experienced administrators and research from experts in the field such as Charlotte Danielson Harvey Silver and Robert Marzano to guide educators to make informed decisions about implementing and improving their evaluation processes to meet their district s needs

*Successful Teacher Evaluation* Thomas L. McGreal, 1983 Teacher evaluation remains a controversial and disruptive area The problems arise from the way evaluations are carried out In many cases the evaluation system used is the problem This book discusses teacher evaluation by providing characteristics separating effective and less effective systems It presents eight commonalities identified in effective evaluation programs In building a system three characteristics are desirable an appropriate attitude toward evaluation an evaluation model complementary to the desired purpose and separation of administrative and supervisory behavior Also an effective system should 1 set goals presented are three approaches management by objectives performance objectives and practical goal setting 2 focus narrowly on teaching 3 improve classroom observation skills and 4 use additional sources of data peer evaluation student performance parent evaluation student evaluation and self evaluation are discussed After building an evaluation system a training program should be designed that addresses the skills needed Recommended training focuses on the teaching learning process and on the enhancement of teacher supervisor relationships Included is an appendix giving an example of an evaluation system reflecting the commonalities of successful systems MD

**Teacher Evaluation** Daniel Linden Duke, Richard J. Stiggins, 1986 This guide written for teachers and administrators wishing to introduce evaluation systems that promote continued teacher growth and enhance school effectiveness suggests that meaningful change requires a clear understanding of what is already in operation substantial skill development and adequate resources for the duration of the change cycle Rather than prescribing a single route to success the guide offers examples of different evaluation experiences describes possible evaluation courses and in separate chapters offers five keys to effective evaluation teachers evaluators performance data feedback and context A subsequent chapter examines the important attributes of these keys in more detail The guide concludes by offering two scenarios for success and a discussion on evaluating existing evaluation procedures improving the teacher evaluation environment and upgrading evaluation skills An appendix includes a teacher evaluation experience questionnaire and a questionnaire for evaluators self examination IW
