

Exercise 1.

Write each real number as an irreducible fraction.

$$A = \frac{\frac{1}{2} - \frac{1}{3}}{\frac{1}{2} - \frac{1}{3}}; \quad B = \frac{\frac{2}{3} - \frac{1}{4}}{\frac{2}{3} + \frac{1}{4}}; \quad C = \frac{\frac{3}{4} - \frac{1}{8}}{\frac{1}{8} - \frac{3}{4}} - 3; \quad D = \frac{\frac{3}{4} + \frac{1}{5} \times \frac{2}{3}}{\frac{2}{3} - \frac{5}{4} \times \frac{1}{10}}$$

$$E = \left(\frac{2}{5} - \frac{7}{4}\right) + \left(2 - \frac{5}{4}\right); \quad F = \frac{12}{15} - \frac{8}{15} + \frac{16}{9}; \quad G = \frac{\frac{2}{3} - \frac{3}{4} + \frac{2}{5}}{\frac{2}{3} + \frac{3}{4} - \frac{2}{5}}$$

$$H = \frac{\frac{1}{2} - \frac{1}{3} + \frac{2}{5} - \frac{1}{6}}{-\frac{1}{2} + \frac{1}{3} + \frac{2}{5} - \frac{1}{6}}; \quad X = \frac{(5^2 \times 10^{-5})^3}{(5^3 \times 10^{-2})^5 \times \left(\frac{10^2}{5}\right)}$$

Exercise 2.

Consider the two real numbers:

$$A = \frac{11}{7} - \frac{2}{5} \times \frac{24}{7} \quad \text{and} \quad B = \frac{3 \times 10^5 \times 6 \times 10^3}{2 \times 10^7 \times 4.5 \times 10^2}$$

Verify by calculation that A and B are two writings for the same number.

Exercise 3.

Give the scientific notation of each of the following real numbers:

$$A = \frac{0.23 \times 10^3 - 1.7 \times 10^2}{0.5 \times 10^{-1}}$$

$$B = 0.000736054$$

$$C = 17.732 \times 10^{-3}$$

$$D = 3 \times 10^{-2} + 5 \times 10^6$$

Exercise 4.

$$\text{Let } A = (\sqrt{3} - 1)^2 + (\sqrt{3} + 1)^2, \quad B = \left(\frac{5}{4} - \frac{1}{2}\right)^2 - \frac{1}{2} \times \frac{3}{4} \quad \text{and} \quad C = \frac{\sqrt{6} - \sqrt{2}}{\sqrt{6} + \sqrt{2}}.$$

- Show that A is a natural number.
- Write B in form of irreducible fraction.
- Rationalize the denominator of C.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 Research for Educational Change presents ways in which educational research can fulfil its commitments to educational practice Focussing its discussion within the context of mathematics education it argues that while research generated insights can have beneficial effects on learning and teaching the question of how these effects are to be generated and sustained is far from evident The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice In the first part of the book four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom In the second part each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms Combining two discourses that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education educational research and classroom practices This book will be key reading for postgraduates researchers and academics in education and particularly in the areas of mathematics education education research teacher education and classroom practice It will also appeal to teacher educators practitioners and undergraduate students interested in educational research

curriculum developers policy makers and classroom teachers who want comprehensive information on what students at grades 4 8 and 12 the grades assessed by NAEP can and cannot do in mathematics After two introductory chapters on the design of NAEP the volume contains a chapter on the challenges in analyzing NAEP data at the item level followed by five chapters that report 2005 through 2013 student performance on specific assessment items These chapters are organized by content area and then by topic e g understanding of place value knowledge of transformations ability to use metric and U S systems of measurement and thus provide baseline data on the proportion of students who are able to complete the mathematics tasks currently used in the upper elementary middle and high school mathematics curriculum Additional chapters focus on student reasoning U S performance on international assessments and using construct analysis rather than percent correct on clusters of items to understand student knowledge on specific mathematics topics Several themes emerge from the volume One is that while the rate of improvement in mathematics learning in grades 4 and 8 has slowed in recent years it has slowed more on some topics than others Another is that relatively minor changes in wording can have significant effects on student performance and thus it is difficult to be specific about what students can do without knowing exactly what questions they were asked A third theme is that changes in performance over time can sometimes but not always be understood in terms of what students are taught For example there were substantial gains on several grade 4 items requiring understanding of fractions and that is probably because the amount of instruction on fractions in grades 3 and 4 has been increasing In contrast while relatively few twelfth grade students have ever been good at factoring trinomials performance on this skill seems to be decreasing This suggests that while more students are completing advanced mathematics courses in high school these courses are not helping in the area of factoring trinomials Finally there are limitations to using NAEP as a measure of student performance on the Common Core State Standards To the extent that NAEP can be used however the NAEP data show a substantial gap between expectations and performance

Last Bell Carl Bistany, Stephanie Gruner Buckley, 2015-11-05 In the mid nineties the Alfred Glickman School was just another failing school in one of America s most violent cities Then SABIS a private for profit education provider took over Twenty years later the school is a six time silver medalist in U S News World Report s annual America s Best High Schools listing and every single graduate of the school has been offered a college place With success of this magnitude you would think that for profit managed charter schools like SABIS would be in high demand On the contrary they are fought at every turn Why is the idea of employing for profit companies to help rescue failing public schools treated with fear and hostility Stranger still why does a nation built on free enterprise refuse to embrace a free market strategy when so many students and schools would clearly benefit and with so much at stake Last Bell is a book about politics money and power It examines the charge that for profits running charter schools are in it for the money not the kids and reveals the real motives of those spreading these ideas and why they fight private sector involvement in public schools Last Bell is a reasonable voice in a polarized debate It does not call for an end to

public schools but rather imagines a future in which private companies help create a competitive market for public education to boost performance turn derelict schools into centers of excellence and give parents even in the worst neighborhoods real choice and their children a future
