Late Kant Towards Another Law Of The Earth:

Late Kant Peter David Fenves,2003 In Late Kant Peter Fenves thoroughly explores Kant's later writings and gives them the detailed scholarly attention they deserve Late Kant Peter Fenves,2004-08-02 Immanuel Kant spent many of his younger years working on what are generally considered his masterpieces the three Critiques But his work did not stop there in later life he began to reconsider subjects such as anthropology and topics including colonialism race and peace In Late Kant Peter Fenves becomes one of the first to thoroughly explore Kant's later writings and give them the detailed scholarly attention they deserve In his opening chapters Fenves examines in detail the various essays in which Kant invents formulates and complicates the thesis of radical evil a thesis which serves as the point of departure for all his later writings Late Kant then turns towards the counter thesis of radical mean ness which states that human beings exist on earth for the sake of another species or race of human beings The consequences of this startling thesis are that human beings cannot claim possession of the earth but must rather prepare the earth for its rightful owners Late Kant is the first book to develop the geo ethics of Kant's thought and the idea that human beings must be prepared to concede their space for another kind of human It is essential reading for anyone interested in the later works of Immanuel Kant **Kant in the Land of Extraterrestrials** Peter Szendy,2013-09-02 Yes Kant did indeed speak of extraterrestrials This phrase could provide the opening for this brief treatise of filosofiction as one speaks of science fiction What is revealed in the aliens of which Kant speaks and he no doubt took them more seriously than anyone else in the history of philosophy are the limits of globalization or what Kant called cosmopolitanism Before engaging Kantian considerations of the inhabitants of other worlds before comprehending his reasoned alienology this book works its way through an analysis of the star wars raging above our heads in the guise of international treaties regulating the law of space including the cosmopirates that Carl Schmitt sometimes mentions in his late writings Turning to track the comings and goings of extraterrestrials in Kant's work Szendy reveals that they are the necessary condition for an unattainable definition of humanity Impossible to represent escaping any possible experience they are nonetheless inscribed both at the heart of the sensible and as an Archimedean point from whose perspective the interweavings of the sensible can be viewed Reading Kant in dialogue with science fiction films he seems already to have seen involves making him speak of questions now pressing in upon us our endangered planet ecology a war of the worlds But it also means attempting to think with or beyond Kant what a point of view might be **Against World Literature** Emily Apter,2014-06-17 Against World Literature On the Politics of Untranslatability argues for a rethinking of comparative literature focusing on the problems that emerge when large scale paradigms of literary studies ignore the politics of the Untranslatable the realm of those words that are continually retranslated mistranslated transferred from language to language or especially resistant to substitution In the place of World Literature a dominant paradigm in the humanities one grounded in market driven notions of readability and universal appeal Apter proposes a plurality of world

literatures oriented around philosophical concepts and geopolitical pressure points The history and theory of the language that constructs World Literature is critically examined with a special focus on Weltliteratur literary world systems narrative ecosystems language borders and checkpoints theologies of translation and planetary devolution in a book set to revolutionize the discipline of comparative literature A Companion to Comparative Literature Ali Behdad, Dominic Thomas, 2014-09-15 A Companion to Comparative Literature presents a collection of more than thirty original essays from established and emerging scholars which explore the history current state and future of comparative literature Features over thirty original essays from leading international contributors Provides a critical assessment of the status of literary and cross cultural inquiry Addresses the history current state and future of comparative literature Chapters address such topics as the relationship between translation and transnationalism literary theory and emerging media the future of national literatures in an era of globalization gender and cultural formation across time East West cultural encounters postcolonial and diaspora studies and other experimental approaches to literature and culture *Climate Change and the Humanities* Alexander Elliott, James Cullis, Vinita Damodaran, 2017-11-01 This volume of essays fills a lacunae in the current climate change debate by bringing new perspectives on the role of humanities scholars within this debate The humanities have historically played an important role in the various debates on environment climate and society The past two decades especially have seen a resurfacing of these environmental concerns across humanities disciplines in the wake of what has been termed climate change This book argues that these disciplines should be more confident and vocal in responding to climate change while questioning the way in which the climate change debate is currently being conducted in academic political and social arenas Addressing climate change through the varied approaches of the humanities means re thinking and re evaluating its fundamental assumptions and responses to perceived crisis through the lens of history philosophy and literature The volume aims thus to be a catalyst for emerging scholarship in this field and to appeal to an academic and popular readership

Radical Philosophy, 2004 **From the Transcendental to the Particular** Jason Michael Peck, 2006 The Enemy of All Daniel Heller-Roazen, 2009 The philosophical genealogy of a remarkable antagonist the pirate the key to the contemporary paradigm of the universal foe The pirate is the original enemy of humankind As Cicero famously remarked there are certain enemies with whom one may negotiate and with whom circumstances permitting one may establish a truce But there is also an enemy with whom treaties are in vain and war remains incessant This is the pirate considered by ancient jurists considered to be the enemy of all In this book Daniel Heller Roazen reconstructs the shifting place of the pirate in legal and political thought from the ancient to the medieval modern and contemporary periods presenting the philosophical genealogy of a remarkable antagonist Today Heller Roazen argues the pirate furnishes the key to the contemporary paradigm of the universal foe This is a legal and political person of exception neither criminal nor enemy who inhabits an extra territorial region Against such a foe states may wage extraordinary battles policing politics and justifying military

measures in the name of welfare and security Heller Roazen defines the piracy in the conjunction of four conditions a region beyond territorial jurisdiction agents who may not be identified with an established state the collapse of the distinction between criminal and political categories and the transformation of the concept of war The paradigm of piracy remains in force today Whenever we hear of regions outside the rule of law in which acts of indiscriminate aggression have been committed against humanity we must begin to recognize that these are acts of piracy Often considered part of the distant past the enemy of all is closer to us today than we may think Indeed he may never have been closer **Walter Benjamin and Art** Andrew Benjamin, 2005-03-18 Walter Benjamin's most famous and influential essay remains *The Work of Art in the Age of Mechanical Reproduction* Walter Benjamin and the Work of Art is the first book to provide a broad and dedicated analysis of this canonical work and its effect upon core contemporary concerns in the visual arts aesthetics and the history of philosophy The book is structured around three distinct areas the extension of Benjamin's work the question of historical connection the importance of the essay in the development of criticism of both the visual arts and literature Contributors to the volume include major Benjamin commentators whose work has very much defined the reception of the essay and leading philosophers historians and aestheticians whose approaches open up new areas of interest and relevance **The Ethics of Latin American Literary Criticism** Erin Graff Zivin, 2007-07-15 The last several decades have witnessed a reorientation of the political and a globalization of the cultural in Latin America shifting literature's function as a homogenizing citizen forming institution to a more dispersed fragmented and potentially democratic and liberating practice At the same time and perhaps in response to this cultural shift the field of Latin American literary studies has expanded to include cultural studies postcolonial theory performance studies gender studies Africana studies and subaltern studies at once expanding and disrupting the boundaries of literature criticism and of Latin America itself In light of these dramatic transformations within a globalized Latin American culture as well as within the field of Latin American literary studies itself what value can we attribute to aesthetics today Is a reconsideration of artistic creation a mere return to the hegemonic lettered city described by Angel Rama Or can we begin to think about an ethical potential inscribed within the act of reading that is an encounter with otherness that irreversibly alters the reading subject *The Messianic Reduction* Peter Fenves, 2011 The Messianic Reduction is the first study of Benjamin's early philosophy that takes into consideration the full range of his work with particular emphasis on its complex relation to phenomenology Kant and neo Kantianism and certain developments in mathematics **Romanticism and the Philosophical Tradition** Thomas Constantinesco, Sophie Laniel-Musitelli, 2015 *Recht und Frieden in der Philosophie Kants* Valério Rohden, 2008 **Proceedings and Addresses of the American Philosophical Association** American Philosophical Association, 2003 List of members in v 1 **The Eighteenth Century** Kevin L.
