### **Introduction**

The dynamic societal issues and priorities present new challenges to law enforcement agencies. Enhanced police visibility is necessary to ensure a reduction in crime rates, drug use, and traffic-related fatalities. The agencies are, however, faced with the problem of limited resources and budgets in the execution of their duties. It is, therefore, recommendable for the agencies to engage proactively law enforcement as a key tool to ensure effective and efficient service delivery to the public. The paper is, therefore, premised on offering solutions to questions related to policing issues.

### **Major Characteristics That Identify the Proactive Police Agency**

Proactive policing is characterized by several qualities. Firstly, the approach community-focused, and it mainly aims at combating a crime before it occurs. Secondly, it targets the improvement of the lives of citizens by creating and enhancing a positive relationship between law enforcement agencies and the people being served (Harmon & Manns, 2017). Much effort should be focused on training the police agencies to make them problem-oriented (Williams, 2015). This is a systematic strategy that allows law enforcement agencies to utilize research, analysis, and thorough assessments in the process of addressing matters which concern the police departments.

Moreover, community policing must also be enhanced. This involves community partnerships, which entail creating an environment of trust which allows the community members and the police to share information freely and openly (Williams, 2015). Organizational management strategies, policies, and structures should also be transformed to facilitate community policing effectively.

### **Major Impediment to Implementing Proactive Policing Style**

The proactive policing approach is associated with several challenges. The biggest impediment involves recruitment, hiring, and retention of officers in every police department. To be effective, all
