## **Louis Kahn Robert McCarter:**

**Louis I Kahn** Robert McCarter, 2022-02-17 A thoroughly updated and redesigned edition of McCarter's esteemed monograph on the globally revered modern master. Louis I Kahn was one of the greatest influences on post WWII world architecture and in the twenty first century his significance has skyrocketed. In this revised, expanded and redesigned edition of Phaidon's bestselling and critically acclaimed monograph, Robert McCarter explores how Kahn redefined Modern architecture and why his work remains a fundamental source today. Extensively illustrated, this comprehensive overview includes both built and unbuilt projects as well as a project realized forty years after Kahn's death: New York City's Four Freedoms Park.

**Louis I Kahn** Robert McCarter, 2005-06-16 US architect Louis Kahn 1901-74 was one of the greatest influences on world architecture during the second half of the twentieth century. This monograph focuses on Kahn's major designs from the Yale Art Gallery in New Haven, Connecticut, the Salk Institute, La Jolla, California, the Kimbell Art Museum in Fort Worth, Texas, Phillips Exeter Library, Exeter, New Hampshire, to the National Capital of Bangladesh and the Indian Institute of Management in Ahmedabad, as well as a number of unfinished projects in order to understand his work and philosophy.

**Place Matters** Robert McCarter, 2019-03 The architecture of WG Clark is inextricably grounded in its place, the Atlantic coastal states of the American South. Over the course of his 40 year career as a modern architect practicing in historic contexts, Clark has constructed a small but significant body of work of unparalleled high quality and experiential richness. Clark's remarkably resolved spatial compositions are formally restrained and contextually appropriate, and while relatively few in number have nevertheless exerted an outsized influence on architects around the world. Clark's regional grounding, slow and measured pace of design, and modest publicity has provided him with the time in place necessary for thinking and making at the very highest level. Like the relatively few works of Louis Kahn and Carlo Scarpa, the works of WG Clark have attained canonical status, and his redefinition of architectural design as being grounded in the history of the discipline, as well as in the particularities of its place, has proved to be of ever increasing relevance to contemporary practice.

**Twenty-Five+ Buildings Every Architect Should Understand** Simon Unwin, 2023-11-03 The underlying theme of *Twenty-Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being, how it frames our lives and orchestrates our experience, how it can help us make sense of the world and contribute to our sense of identity and place. Exploring these dimensions through a wide range of case studies that illustrate the rich diversity of twentieth and twenty-first century architecture, this book is essential reading for every architect. With the addition of numerous shorter analyses, this new edition covers an even greater range of architectural ideas, providing students and architects with further inspiration for exploration in their own design work. Architects live by ideas. But where do they come from? And how do they shape buildings? There is no one right way to do architecture. This book illustrates many. Its aim is to explore the rich diversity of architectural creativity by analysing a wide range of examples to extract the ideas behind them.

Twenty Five Buildings Every Architect Should Understand is a companion to Simon Unwin's *Analysing Architecture the Universal Language of Place Making* most recent edition 2021 and part of the trilogy which also includes his *Exercises in Architecture Learning to Think as an Architect* second edition 2022 Together the three books offer an introduction to the workings of architecture providing for the three aspects of learning theory examples and practice *Twenty Five Buildings* focusses on analysing examples using the methodology offered by *Analysing Architecture* which operates primarily through the medium of drawing An underlying theme of *Twenty Five Buildings Every Architect Should Understand* is the relationship of architecture to the human being how it frames our lives and orchestrates our experiences how it can help us give form to the world and contributes to our senses of identity and place Exploring these dimensions through case studies that illustrate the rich diversity of twentieth and twenty first century architecture this book is essential reading and hopefully an inspiration for every architect In this new edition supplementary analysis and discussion has been added to each of the twenty five case studies drawing attention to their influences from and on other architects A number of extra shorter analyses have been included too following the practice of presenting extra small dishes interspersed among main courses in high end restaurants These additional short analyses account for the sign after Twenty Five in the title of this edition and double the number of buildings analysed to around fifty

**Frank Lloyd Wright** Robert McCarter, 1999-08-26 Describes the life and career of the famous architect

**Constructing Building Enclosures** Clifton Fordham, 2020-07-21 *Constructing Building Enclosures* investigates and interrogates tensions that arose between the disciplines of architecture and engineering as they wrestled with technology and building cultures that evolved to deliver structures in the modern era At the center of this history are inventive architects engineers and projects that did not settle for conventional solutions technologies and methods Comprised of thirteen original essays by interdisciplinary scholars this collection offers a critical look at the development and the purpose of building technology within a design framework Through two distinct sections the contributions first challenge notions of the boundaries between architecture engineering and construction The authors then investigate twentieth century building projects exploring technological and aesthetic boundaries of postwar modernism and uncovering lessons relevant to enclosure design that are typically overlooked Projects include Louis Kahn's Weiss House Minoru Yamasaki's Science Center Sigurd Lewerentz's Chapel of Hope and more An important read for students educators and researchers within architectural history construction history building technology and design this volume sets out to disrupt common assumptions of how we understand this history

**Louis Kahn** Mateo Kries, Jochen Eisenbrand, Stanislaus von Moos, 2012 The American architect Louis Kahn 1901 1974 is regarded as one of the great master builders of the twentieth century With complex spatial compositions an elemental formal vocabulary and a choreographic mastery of light Kahn created buildings of archaic beauty As the first comprehensive publication on this architect in 20 years the book *Louis Kahn The Power of Architecture* presents all of his important projects It includes essays by prominent Kahn experts and an expansive illustrated biography with many

new facts and insights about Kahn's life and work. In a number of interviews leading architects such as Frank Gehry, Renzo Piano, Peter Zumthor, and Sou Fujimoto underline Kahn's significance in today's architectural discourse. An extensive catalogue of works features original drawings and architectural models from the Kahn archive. The compendium is further augmented by a portfolio of Kahn's travel drawings as well as photographs by Thomas Florschuetz which offer completely new views of the Salk Institute and the Indian Institute of Management. *The Space Within* Robert McCarter, 2016-11-15

Alvar Aalto once argued that what mattered in architecture wasn't what a building looks like on the day it opens but what it is like to live inside it thirty years later. In this book architect and critic Robert McCarter persuasively argues that interior spatial experience is the necessary starting point for design and the quality of that experience is the only appropriate means of evaluating a work after it has been built. McCarter reveals that we can't really know a piece of architecture without inhabiting its spaces and we need to counter our contemporary obsession with exterior views and forms with a renewed appreciation for interiors. He explores how interior space has been integral to the development of modern architecture from the late 1800s to today and he examines how architects have engaged interior space and its experiences in their design processes fundamentally transforming traditional approaches to composition. Eloquently placing us within a host of interior spaces he opens up new ways of thinking about architecture and what its goals are and should be. **Trajectories in**

**Architecture** Michael Jasper, 2023-04-21 *Trajectories in Architecture: Plan, Sensation, Temporality* presents a compelling examination of underlying issues in late twentieth century architecture. Three formal preoccupations and conceptual orientations are used as guiding threads or trajectories. These three trajectories—the plan as conceptual device, a logic of sensation and temporalities—serve to organise individual chapters in the central sections of the book and provide a new lens to the study of period work, revealing architectural conditions and consequent spatial effects little explored to date. *Trajectories in Architecture* adds to scholarship and expands our understanding of the role of conceptual and formal criteria in the analysis and creation of works of architecture. The book provides potentially transformative new interpretations of influential architects and key projects from the last half of the twentieth century to reveal new alignments and potentialities in architecture's recent past as a contribution to identifying future possibilities. In so doing the book argues for the still latent potential in modern architecture's traditions and design principles and their future expression. *Trajectories in Architecture* includes analysis of significant projects of Le Corbusier, Peter Eisenman, Zaha Hadid, John Hejduk, Louis I. Kahn, and I. M. Pei.

*Grafton Architects* Robert McCarter, 2018-06-29 Founded by Yvonne Farrell and Shelley McNamara in 1978, Dublin-based Grafton Architects has built up an impressive body of work over its forty-year history, ranging from houses in Ireland to public buildings in Italy, France, Peru, and the UK. In this long overdue study, respected architectural writer and critic Robert McCarter presents fifty of Grafton's built and unbuilt projects and brings to light their principled and ethical approach, which is committed to making a profound difference to the lives of their buildings' users. Curators of the Venice Biennale of

Engel,2022-05-11 Colin Rowe is recognized as one of the most influential architecture teachers of the twentieth century yet he is more popularly known for his critical essays This book investigates the methods that made Rowe such an influential teacher Paralleling the promises of the modernists to biblical prophecies of salvation Rowe led his students into the temptations of modern architecture in order to test their convictions in architectural design Everything Rowe did taught and beyond his published writing this book uniquely pulls from his personal notes sketches talks and thoughts This analysis of Rowe s use of irony paradox ambiguity and subversion will benefit educators and designers interested in the roles of mischief and curiosity in creative endeavors The book offers a more balanced appreciation of Colin Rowe while rethinking attitudes to pedagogy historical interpretation and meaning in the arts *Dwell* ,2005-07 At Dwell we re staging a minor revolution We think that it s possible to live in a house or apartment by a bold modern architect to own furniture and products that are exceptionally well designed and still be a regular human being We think that good design is an integral part of real life And that real life has been conspicuous by its absence in most design and architecture magazines *Aalto* Robert McCarter,2014-05-30 Discover the Nordic brilliance of master architect Alvar Aalto **Carlo Scarpa** Robert McCarter,2021-03-25 The acclaimed survey of the life and works of the celebrated Italian modernist master available again in a classic format The work of Carlo Scarpa challenged and

continues to challenge accepted notions of modern architecture While several books have been published on his work none has approached the breadth and depth of this monograph by Robert McCarter who is celebrated for his meticulously researched experientially based and jargon free accounts of key figures in modern architecture This book is the definitive study of Scarpa s many accomplishments including such works at the Canova Museum the Castelveccchio Museum and the Brion Cemetery among others **The Architects' Journal** ,2005 Public Catalyst Manuel Bailo,2022-03-11

Demonstrates the existence of public space catalysts as well as the need for their presence for an expectant or indifferent place to be activated This work which understands that the city now and always has had and must have public spaces of intensity proposes urban catalysts as agents that are capable of activating a place that was previously indifferent The comparative work of historical and recent cases developed by research and drawings has allowed us to discover that the vivid public spaces of identity and reference have been formed due to the urban effect caused by these agents that we call catalysts Manuel Bailo s work includes a wide range of projects ranging from urban scale to interiorism It has been widely published and presented with awards Co published with University of Virginia School of Architecture Aldo Van Eyck Robert McCarter,2015-01-01 Robert McCarter provides a comprehensive study of Aldo van Eyck s 50 year career guiding readers through the architect s buildings and unrealised projects with a focus on the interior spatial experience as well as the design and construction processes He investigates how van Eyck s writings and lectures convey the importance of architecture in the everyday lives of people around the world and throughout history and by presenting the architect s design work together with the principles on which it was founded illuminates van Eyck s ethical interpretation of architecture s place in the world **Renegades** Luca Guido,Stephanie Pilat,Angela Person,2020-01-28 Like America itself the architecture of the United States is an amalgam an imitation or an importation of foreign forms adapted to the natural or engineered landscape of the New World So can there be an American School of architecture The most legitimate claim to the title emerged in the 1950s and 1960s at the Gibbs College of Architecture at the University of Oklahoma where under the leadership of Bruce Goff Herb Greene Mendel Glickman and others an authentically American approach to design found its purest expression teachable in its coherence and logic Followers of this first truly American school eschewed the forms most in fashion in American architectural education at the time those such as the French Beaux Arts or German Bauhaus Schools in favor of the vernacular and the organic The result was a style distinctly experimental resourceful and contextual challenging not only established architectural norms in form and function but also traditional approaches to instructing and inspiring young architects Edited by Luca Guido Stephanie Pilat and Angela Person this volume explores the fraught history of this distinctively American movement born on the Oklahoma prairie Renegades features essays by leading scholars and includes a wide range of images including rare never before published sketches and models Together these essays and illustrations map the contours of an American architecture that combines this country s landscape and technology through

experimentation and invention assembling the diversity of the United States into structures of true beauty Renegades for the first time fully captures the essence and conveys the importance of the American School of architecture
