

Mindset Mathematics - Grade K

youcubed
a Stanford University

Building a Mathematical Mindset Community

Teachers and students believe *everyone* can learn maths at **HIGH LEVELS**.

- Students are not tracked or grouped by achievement
- All students are offered high level work
- "I know you can do this" "I believe in you"
- Praise effort and ideas, not the person
- Students vocalize self-belief and confidence

The maths is **VISUAL**

- Teachers ask students to draw their ideas
- Tasks are posed with a visual component
- Students draw for each other when they explain
- Students gesture to illustrate their thinking

The environment is filled with *WONDER* and **CURIOSITY**.

- Students extend their work and investigate
- Teacher invites curiosity when posing tasks
- Students see maths as an unexplored puzzle
- Students freely ask and pose questions
- Students seek important information
- "I've never thought of it like that before."

Communication and *connections* are valued.

- Students work in groups sharing ideas and visuals.
- Students relate ideas to previous lessons or topics
- Students connect their ideas to their peers' ideas, visuals, and representations.
- Teachers create opportunities for students to see connections.
- Students relate ideas to events in their lives and the world.

The maths is **OPEN**.

- Students are invited to see maths differently
- Students are encouraged to use and share different ideas, methods, and perspectives
- Creativity is valued and modeled.
- Students' work looks different from each other
- Students use ownership words - "my method", "my idea"

The classroom is a *risk-taking*, **MISTAKE VALUING** environment

- Students share ideas even when they are wrong
- Peers seek to understand rather than correct
- Students feel comfortable when they are stuck or wrong
- Teachers and students work together when stuck
- Tasks are low floor/high ceiling
- Students disagree with each other and the teacher

Resources in Education ,1988 **The Leaders of Their Own Learning Companion** Ron Berger,Anne Vilen,Libby Woodfin,2019-09-17 A New Companion to Leaders of Their Own Learning Puts Students in Charge of Their Learning and Growth Five years after the publication of Leaders of Their Own Learning EL Education is back with a new companion guide to help you tackle the common challenges of student engaged assessment This unique student centered approach to assessment equips and compels students to understand goals for their learning and growth track their progress toward those goals and take responsibility for reaching them EL Education has more than 25 years of experience supporting school transformation through student engaged assessment With their new book The Leaders of Their Own Learning Companion they have harvested the best tools and wisdom from schools across the country to help you hone student led assessment practices in your classroom and school Identifies the common challenges of implementing each of the eight interrelated student engaged assessment practices from Leaders of Their Own Learning and provides strategies and tools for tackling them Offers practical tips for school leaders Deepens your learning with 46 videos and an online toolbox The Leaders of Their Own Learning Companion is designed for teachers and leaders of all grade levels and no prior knowledge of the original Leaders of Their Own Learning is necessary to make the most of this book **10 to 25** David Yeager,2024-08-06 NATIONAL BESTSELLER Acclaimed developmental psychologist David Yeager reveals the new science of motivating young people ages ten through twenty five in this groundbreaking book that is a must read for managers parents educators coaches and mentors everywhere Required reading for anyone who aspires to be a wise influence on the young people they care about Angela Duckworth One of the most fascinating and important books of the past decade It will change millions of lives Carol Dweck This engaging data driven book is filled with practical insights Adam Grant Imagine a world in which Gen Xers millennials and boomers interact with young people in ways that leave them feeling inspired enthusiastic and ready to contribute rather than disengaged outraged or overwhelmed That world may be closer than you think In this book based on cutting edge research psychologist David Yeager explains how to stop fearing young people s brains and hormones and start harnessing them Neuroscientists have discovered that around age ten puberty spurs the brain to crave socially rewarding experiences such as pride admiration and respect and to become highly averse to social pain such as humiliation or shame As

a result young people are subtly reading between the lines of everything we say trying to interpret the hidden implications of our words to find out if we are disrespecting or honoring them Surprisingly this sensitivity to status and respect continues into the mid twenties 10 to 25 helps adults develop an ear for the difference between the right and wrong way to respect young people and avoid frustrating patterns of miscommunication and conflict Yeager explains how to adopt what he terms the mentor mindset which is a leadership style that is attuned to young people's need for status and respect Anyone can adopt the mentor mindset by following a few highly effective and easy to learn practices such as validating young people's perspectives rather than dismissing them asking them questions rather than telling them what to do being transparent about your beliefs and goals rather than assuming that they will accurately guess your thoughts and holding them to high standards rather than coddling them Yeager's scientific experiments have shown these practices reduce a wide variety of behavior problems including school dropout unhealthy eating stress purposelessness mental health problems and more One of the biggest misconceptions about mentoring is that it takes up too much time On the contrary those who use the mentor mindset end up with more time Through back and forth conversations young people feel empowered and managers can transfer responsibility to them Young people in this age group are poised to learn grow and accomplish incredible things if only we can tap into the basic neurobiological systems that drive their motivation and behavior An essential read for anyone who interacts with young people 10 to 25 is a groundbreaking book that offers long term strategies to help nurture well adjusted independent accomplished young people who contribute to society in positive ways all while making our own lives easier

Rethinking Readiness Rafael Heller, Rebecca E. Wolfe, Adria Steinberg, 2021-02-17 Rethinking Readiness offers a new set of competencies to replace the narrow learning goals of No Child Left Behind and in chapters written by some of the nation's most well respected education scholars explores their implications for schools Today's students must cultivate the full range of intellectual interpersonal and intrapersonal capacities that have been grouped together under the banner of deeper learning Rethinking Readiness focuses on how educators and policy makers should move forward to provide the educational experiences that students need to become truly well prepared for college careers and civic life including changes in curriculum teacher evaluation and student assessment As state leaders chart a new course for K 12 education in the Every Student Succeeds Act era Rethinking Readiness offers a succinct and compelling vision for a new agenda for school reform so future generations can prosper in a rapidly changing world

Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 1 Jo Boaler, Jen Munson, Cathy Williams, 2021-01-27 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you'll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the first grade level through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they

want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum

Assessment Practices in Undergraduate Mathematics Bonnie Gold,Sandra Keith,William A.
