Elngar,2024-06-19 This book presents the role of AI Driven Digital Twin in the Industry 4 0 ecosystem by focusing on Smart Manufacturing sustainable development and many other applications It also discusses different case studies and presents an in depth understanding of the benefits and limitations of using AI and Digital Twin for industrial developments AI Driven Digital Twin and Industry 4 0 A Conceptual Framework with Applications introduces the role of Digital Twin in Smart Manufacturing and focuses on the Digital Twin framework throughout It provides a summary of the various AI applications in the Industry 4 0 environment and emphasizes the role of advanced computational and communication technologies The book offers demonstrative examples of AI Driven Digital Twin in various application domains and includes AI techniques used to analyze the environmental impact of industrial operations along with examples The book reviews the major challenges in the deployment of AI Driven Digital Twin in the Industry 4 0 ecosystem and presents an understanding of how AI is used in the designing of Digital Twin for various applications The book also enables familiarity with various industrial applications of computational and communication technologies and summarizes the ongoing research and innovations in the areas of AI Digital Twin and Smart Manufacturing while also tracking the various research challenges along with future advances This reference book is a must read and is very beneficial to students researchers academicians industry experts and professionals working in related fields

Evolutionary Computation & Swarm Intelligence Fabio Caraffini,Valentino Santucci,Alfredo Milani,2020-11-25 The vast majority of real world problems can be expressed as an optimisation task by formulating an objective function also known as cost or fitness function The most logical methods to optimise such a function when 1 an analytical expression is not available 2 mathematical hypotheses do not hold and 3 the dimensionality of the problem or stringent real time requirements make it infeasible to find an exact

solution mathematically are from the field of Evolutionary Computation EC and Swarm Intelligence SI The latter are broad and still growing subjects in Computer Science in the study of metaheuristic approaches i e those approaches which do not make any assumptions about the problem function inspired from natural phenomena such as in the first place the evolution process and the collaborative behaviours of groups of animals and communities respectively This book contains recent advances in the EC and SI fields covering most themes currently receiving a great deal of attention such as benchmarking and tuning of optimisation algorithms their algorithm design process and their application to solve challenging real world problems to face large scale domains
