Maths Literacy Grade 1 paper 2:

Teaching Learners with Visual Impairment Maximus M. Sefotho, Ronél Ferreira, 2020-12-31 This book *Teaching Learners with Visual Impairment* focuses on holistic support to learners with visual impairment in and beyond the classroom and school context. Special attention is given to classroom practice, learning support, curriculum differentiation and assessment practices to mention but a few areas of focus covered in the book. In this manner, this book makes a significant contribution to the existing body of knowledge on the implementation of inclusive education policy with learners affected by visual impairment.

Research for Educational Change Jill Adler, Anna Sfard, 2016-06-17 *Research for Educational Change* presents ways in which educational research can fulfil its commitments to educational practice. Focussing its discussion within the context of mathematics education, it argues that while research generated insights can have beneficial effects on learning and teaching, the question of how these effects are to be generated and sustained is far from evident. The question of how to turn research into educational improvement is discussed here in the context of learning and teaching hindered by poverty and social injustice. In the first part of the book, four teams of researchers use different methodologies while analysing the same corpus of data collected in a South African mathematics classroom. In the second part, each of these teams makes a specific proposal about what can be done and how so that its research generated insights have a tangible beneficial impact on what is happening in mathematical classrooms. Combining two discourses, that of researchers speaking to one another and that of researchers communicating their insights to those responsible for educational practice, the book deals with the perennial question of communication between those who study educational processes and those who are directly responsible for teacher education, educational research and classroom practices. This book will be key reading for postgraduates, researchers and academics in education and particularly in the areas of mathematics education, education research, teacher education and classroom practice. It will also appeal to teacher educators, practitioners and undergraduate students interested in educational research.

Resources in Education, 1999-10 *Writing, Redefined* Shawna Coppola, 2023-10-10 What does it mean to write or to be a writer? In Shawna Coppola's book *Writing, Redefined: Broadening Our Ideas of What It Means to Compose*, she challenges the reader to expand beyond standard alphabetic writing and consider alternative forms of composition when assigning writing to students. This book empowers teachers to change what counts as writing in schools and classrooms, opening the door to students who may not consider themselves to be writers but should and can. Inside you'll find alternative engaging writing assignments that are visual, aural or multimodal that will involve all students, specifically those who prefer to compose using a wider array of forms and modes. For whom standard English is not the norm, who have been identified as dyslexic, whose cultural traditions lean heavily towards more aural forms of composition, who are considered struggling writers. By finding ways to accommodate all styles of writers, students are free to unleash their creativity and share their story with others. While there is no question composition in written form is

important and worth of study broadening our definition of writing expands an enormous range of possibilities for composing for all students
