Poppito PhD,2014-08-07 The importance of spiritual well being and the role of meaning in moderating depression hopelessness and desire for death in terminally ill cancer and AIDS patients has been well supported by research and has led many palliative clinicians to look beyond the role of antidepressant treatment in this population Clinicians are focusing on the development of non pharmacologic interventions that can address issues such as hopelessness loss of meaning and spiritual well being in patients with advanced cancer at the end of life This effort led to an exploration and analysis of the work of Viktor Frankl and his concepts of logotherapy or meaning based
