Instrumentation Reference Book Walt Boyes,2002-12-02 Instrumentation is not a clearly defined subject having a fuzzy boundary with a number of other disciplines Often categorized as either techniques or applications this book addresses the various applications that may be needed with reference to the practical techniques that are available for the instrumentation or measurement of a specific physical quantity or quality This makes it of direct interest to anyone working in the process control and instrumentation fields where these measurements are essential Comprehensive and authoritative collection of technical information Written by a collection of specialist contributors Updated to include chapters on the fieldbus standards reliability EMC virtual instrumentation fibre optics smart and intelligent transmitters analyzers level and flow meters and many more Jones' Instrument Technology: Mechanical measurements Ernest Beachcroft Jones,B. E. Noltingk,1985 This set of five volumes covers all aspects of instrument technology Each volume has a part title *Mechanical Measurements* B E Noltingk,2016-01-22 Jones Instrument Technology Volume 1 Mechanical Measurements Fourth Edition provides a comprehensive discussion of the design operation and application of various instruments for different types of measurements The material has been grouped by application but supplemented by one or two techniques chapters The text is primarily a stand alone description of current practice For the greatest part readers will learn most from it simply by reading what it says itself Because this book does not go into the greatest detail most chapters feature a listing of more specialized books

where particular subjects are dealt with more fully The book covers instrumentation for measurements of flow viscosity length strain level and volume vibration force density pressure vacuum and particle size It is aimed at a technician readership as were earlier editions Specialist instrument designers can find in this book a sound foundation on which they can build Would be graduate engineers who do not specialize in instrumentation will also find the broad coverage they need
