Mcmullan Environmental Science In Building:

Environmental Science in Building Randall McMullan, 2017-12-01 This popular textbook covers how the built environment and the management of energy relate to the quality of human living conditions and the environmental performance of buildings. It is the key introductory text for understanding the principles and theories of the environmental science behind construction and the only text on the market to provide the basic scientific principles of such a broad range of topics. The text covers a range of areas in the field including climate change, energy management and sustainability in construction with an important focus on contemporary environmental topics such as carbon lifetime performance and rating schemes. The author is known for his extremely clear, finely crafted text and the book offers a wealth of excellent worked examples. This text is designed to be useful at all levels to students and practitioners of architecture, construction studies, building services, surveying and environmental science. New to this Edition: Expansion upon the environmental narrative with coverage of contemporary topics such as carbon lifetime performance and rating schemes. Additional figures, images and sub-topics in chapters. An updated section on building services to give a broader understanding of modern building services equipment, options, specifications and performance implications. Inclusion of a new section which offers commentary on the future of environmental science in building. *Environmental Science in Building* R. McMullan, 1989

GBEN 2006 International Conference on Global Built Environment Global Built Environment Network, 2006-08-31 Proceedings of the GBEN 2006 Conference: Global Built Environment Towards an Integrated Approach for Sustainability. Hosted by the Department of Built Environment, University of Central Lancashire, Preston, UK. Organised jointly by the University of Central Lancashire, Edgehill University and National University of Ireland, Cork. Conference dates: 11-12 September 2006. **Managing the Building Design Process** Gavin Tunstall, 2006 This volume explains the designer's role in the creation of new buildings from the development of the plan through to completion. It expands on the first edition including sections on CAD and sustainability incorporating updates to legislation and adding new illustrations and discussion points. **Sustainable Building for a Cleaner Environment** Ali Sayigh, 2018-07-12 This book contains selected papers presented during the bi-annual World Renewable Energy Network's Med Green Forum aimed at the international community as well as Mediterranean countries. This forum highlights the importance of growing renewable energy applications in two main sectors: Electricity Generation and the Sustainable Building Sector. In-depth chapters highlight the most current research and technological breakthroughs covering a broad range of renewable energy technologies and applications in all sectors for electricity production, heating and cooling, agricultural applications, water desalination, industrial applications and for the transport sectors. **Building Technology** Ivor H. Seeley, 1995-11-11 Describes and examines the constructional techniques, choice and use of materials and the statutory requirements for domestic buildings. The text is generously supported by more than 60 pages of drawings and sketches. It is aimed at first and second year students in a wide variety of
