Microenvironment Jacinta Serpa, 2020-03-04 The way a cell undergoes malignant transformation should meet their capacity of surviving in the microenvironment of the organ where the cancer will develop Metabolic adaptation is for sure one of the criteria that must be accomplished driven by metabolic plasticity that allows the adaptation of cancer cells to the availability of energy and biomass sources that will sustain cell survival and proliferation Each human organ has a particular microenvironment which depends on several cell types and in some cases also on symbiotic microorganisms These biological

partners are constantly sharing organic compounds and signaling molecules that will control mitogenesis cell death and differentiation accounting for the organ s function Nevertheless cancer cells are capable of taking advantage of this metabolic and signaling microenvironmental dynamics In this book we intend to present the different components of the microenvironment driving the metabolic fitness of cancer cells Themetabolic changes required for establishing a tumor in a given microenvironment and how these metabolic changes limit the response to drugs will generally be the major items addressed It is important to mention not only aspects of the microenvironment that stimulate metabolic changes and that select better adapted tumor cells but also how this regulation of cell plasticity is made Thus the signaling pathways that orchestrate and are orchestrated throughout this panoply of metabolic rearrangements will also be addressed in this book The subjects will be presented from the conceptual point of view of the cross cancer mechanisms and also particularizing some models that can be examples and enlightening within the different areas

DeShannon Davis,2009 Student achievement and the incorporation of technology into the classroom have become a focus for
schools all across the United States In spite of emphasis on reading writing and arithmetic standardized test scores indicate
that US students understanding of math is insufficient In an effort to identify a means of solving the problem of low
achievement levels in math Interactive Whiteboards IWB as a learning tool in eighth grade math classes at Clarkdale
Attendance Center was evaluated for its effectiveness Additionally the impact of differentiated learning styles on Mississippi
Curriculum Test 2 MCT2 math scores was analyzed With today s generation of students being so technology oriented it
seems only fitting that teachers continue to find different technological ways to meet the needs of all learners in order for
them to achieve academically The reasons for this research include a determining if the implementation of IWB help increase
student achievement in eighth grade math at Clarkdale Attendance Center and b determining if IWB meet the needs of all
individual learning styles Not concurring with IWB literature data obtained through this study indicated that IWB had no
significant difference in eighth grade MCT2 mathematics test scores between students who were instructed using IWB
technology and those who were not instructed with IWB technology and that IWB had no significant effect of learning styles
on students eighth grade MCT2 mathematics test scores adjusting for the effect of students seventh grade MCT mathematics
test scores Future research which replicates this study could be conducted with various other grades school districts and
states to determine if the results of this study are consistent with findings related to it
