Joseph II Pro In Power:

Performing Power Maria Berlova, 2021-04-19 Performing Power explores 18th century fabrication of the royal image by focusing on the example of King Gustav III 1746-1792 one of Sweden's most acclaimed and controversial monarchs who conspicuously chose theater as the primary media for his image making and role construction. The text postulates that Gustav III was motivated by theater's ability to aid him in fulfilling Enlightenment's tenet of broadly educating the populace and inculcating it with royal ideology. That he was an amateur actor, stage director, and playwright were other engines driving his choice. The project challenges and expands the commonly accepted perception of Gustav III's contribution to Swedish theater which has generally been limited to founding its National Opera, developing its national drama, and forming its national dramatic repertoire. Maria Berlova presents Gustav III as a performing King who strategically used political events as a framework through which he could embody the image of the ideal or enlightened monarch as presented by Voltaire. Through this Performing Power explores the tight relationship and complex bond between theatrical arts and politics. This unique study will be of great interest to students and scholars in theater studies, 18th century culture, and politics. **The Birth of a**

Great Power System, 1740-1815 Hamish Scott, 2014-07-22 The Birth of a Great Power System 1740-1815 examines a key development in modern European history: the origins and emergence of a competitive state system. H. M. Scott demonstrates how the well-known and dramatic events of these decades—the emergence of Russia and Prussia, the three partitions of Poland, the continuing retreat of the Ottoman Empire, the unprecedented territorial expansion of Revolutionary and Napoleonic France halted by the final defeat of Napoleon—were part of a wider process that created the modern great power system dominated by Europe's five leading states. Enhanced by maps and a chronology of principal events, this comprehensive and accessible textbook is fully up to date in its coverage of recent scholarship. Unlike many other treatments of this period, Scott extends his beyond the French Revolution of 1789 in order to demonstrate how events both before and after this great upheaval merged to produce the central political development in modern European history. This book addresses the crucial phase in the emergence of the modern international system which, with the subsequent addition of the USA, Japan, and Russia, has prevailed until the present day. **Joseph II** T. C. W. Blanning, 2013-11-26 Joseph II 1741-90 son and eventual successor of Maria Theresa has conventionally been seen in the context of the Enlightened Despot reformers. Today's turmoil in his former territories invites a rather different perspective, however, as Joseph grapples with the familiar and intractable problems of creating a viable unitary state out of his multi-national empire in Central Europe. Professor Blanning's brilliant short study, based on extensive archival research, offers a history of the Habsburg monarchy in the eighteenth century as well as a revaluation of the emperor's complex personality and his ill-fated reform programme. **The Balance of Power**
