June Memorandum For Geography 2013 Grade 1:

Life in the Age of Drone Warfare Lisa Parks, Caren Kaplan, 2017-10-19 This volume's contributors offer a new critical language through which to explore and assess the historical juridical geopolitical and cultural dimensions of drone technology and warfare. They show how drones generate particular ways of visualizing the spaces and targets of war while acting as tools to exercise state power. Essays include discussions of the legal justifications of extrajudicial killings and how US drone strikes in the Horn of Africa impact life on the ground as well as a personal narrative of a former drone operator. The contributors also explore drone warfare in relation to sovereignty governance and social difference, provide accounts of the relationships between drone technologies and modes of perception and mediation and theorize drones' relation to biopolitics, robotics, automation and art. Interdisciplinary and timely, *Life in the Age of Drone Warfare* extends the critical study of drones while expanding the public discussion of one of our era's most ubiquitous instruments of war. Contributors: Peter Asaro, Brandon Wayne Bryant, Katherine Chandler, Jordan Crandall, Ricardo Dominguez, Derek Gregory, Inderpal Grewal, Lisa Hajjar, Caren Kaplan, Andrea Miller, Anjali Nath, Jeremy Packer, Lisa Parks, Joshua Reeves, Thomas Stubblefield, Madiha Tahir.

Green Criminology Rob White, Diane Heckenberg, 2014-02-03 Over the past ten years, the study of environmental harm and crimes against nature has become an increasingly popular area of research amongst criminologists. This book represents the first international comprehensive and introductory text for green criminology, offering a concise exposition of theory and concepts and providing extensive geographical coverage, diversity and depth to the many issues pertaining to environmental harm and crime. Divided into three sections, the book draws on a range of international case studies and examples and looks at the conceptual and methodological foundations of green criminology before examining in detail areas of environmental crime and harm and how they are addressed, including climate change and social conflict, abuse and harm to animals, threats to biodiversity, pollution and toxic waste, environmental victims, environmental regulation, law enforcement and courts, environmental forensic studies, environmental crime prevention. *Green Criminology* is packed with pedagogical features including dialogue boxes, case examples, discussion questions and lists of further reading and is perfect for students around the world engaged with green criminology and crime against the environment.

Our Social World Jeanne H. Ballantine, Keith A. Roberts, Kathleen Odell Korgen, 2016-11-30 Inspire your students to develop their sociological imaginations in *Our Social World*. Focused on deep learning rather than memorization, this book encourages readers to analyze, evaluate and apply information about the social world to see the connection between the world and personal events from a new perspective and to confront sociological issues on a day-to-day basis. Organized around the Social World Model, a conceptual framework used across chapters to see the complex links between various micro to macro levels of the social system, students will develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of discrete subjects.

The Greening of London, 1920-2000 Matti O. Hannikainen, 2017-05-15 The long term

development of public green spaces such as parks public gardens and recreation grounds in London during the twentieth century is a curiously neglected subject despite the fact that various kinds of green spaces cover huge areas in cities in the UK today This book explores how and why public green spaces have been created and used in London and what actors have been involved in their evolution during the course of the twentieth century Building on case studies of the contemporary boroughs of Camden and Southwark and making use of a wealth of archival material the author takes us through the planning and creation stages to the intended and actual uses and ongoing management of the spaces By highlighting the rise and fall of municipal authorities and the impact of neo liberalism after the 1970s the book also deepens our understanding of how London has been governed planned and ruled during the twentieth century It makes a crucial contribution to academic as well as political discourse on the history and present role of green space in sustainable cities
