Powering Forward Bill Ritter, Jr., 2016-03-15 A historic energy revolution is underway in the United States Wind sunlight and other sustainable resources are now the fastest growing sources of energy in the U S and worldwide American

families are installing power plants on their roofs Entire communities are switching to 100% renewable energy The urgent need to prevent climate change is causing people around the planet to question their reliance on carbon intensive oil coal and natural gas Author Bill Ritter Jr the 41st governor of Colorado and one of America s foremost leaders on sustainable energy resources and implementation discusses the forces behind the energy revolution the new ways we must think about energy and the future of fossil and renewable fuels It is an essential read for any who want to understand one of history s biggest challenges to peace prosperity and security in the United States

Venture Capital Investment and Government Incentives Tamara Wilkinson,2024-09-05 This book explores the best ways for governments to design venture capital investment incentives Venture capital is a multi billion dollar industry and a major driver of innovation and national growth Investment in startup companies by venture capital funds helps finance new inventions and create wealth economic growth and jobs However because venture capital investment is highly risky and sensitive to market downturns many governments around the world use special legal and tax incentives to help encourage this form of investment Since the introduction of the first venture capital incentive in the USA in 1958 scores of venture capital incentives have come and gone These incentives have experienced varied success with some failing entirely Filling a gap in an important area this book employs a legal and regulatory approach to examine venture capital policy from a global perspective It uses an analytical framework to evaluate the design implementation and success of incentives and looks at over 60 examples from 25 countries around the world The book is aimed at researchers and policy makers in law finance and economics as well as practitioners and investors in the venture capital space The book introduces the legal aspects of venture capital investment and presents a list of leading practice guidelines and recommendations to help policy makers design effective efficient and appropriate venture capital incentives

The Political Economy of Electricity Mark Cooper,2017-04-24 Providing critical insights that will interest readers ranging from economists to environmentalists policymakers and politicians this book analyzes the economics and technology trends involved in the dilemma of decarbonization and addresses why aggressive policy is required in a capitalist political economy to create a sea change away from fossil fuels The environmental damage across the globe is a result of the success of capitalist industrialism 250 years of carbon pollution resulting from consumption of fossil fuels to drive the economy and the worldwide aspiration to ever increasing levels of economic development But capitalism has also produced the tools to solve the problems it has created in the form of a technological revolution in low carbon renewables distributed resources and intelligent systems to integrate supply and demand This book comprehensively examines the political economy of electricity and analyzes the challenge of transforming today s electricity sector to meet the dual goals of decarbonization and development expressed in the Paris Agreement Author Mark Cooper defines the dilemma of development and decarbonization as the great challenge facing the electricity industry and documents how the economic resources costs of a 100 percent renewable portfolio has declined to the point that decarbonization can pay for itself making

the low carbon renewable technologies that enable desired environmental and public health benefits an easy sell He identifies the substantial benefit of increasing use of information communications and advanced control technologies shows how targeted innovation could speed the transition by a decade or two and lower the overall cost of the transition by as much as half and explains why the flexible multi stakeholder approach of the Paris Agreement is the correct approach
