Powering Science National Academies of Sciences, Engineering, and Medicine, Division on Engineering and Physical Sciences, Space Studies Board, Committee on Large Strategic NASA Science Missions: Science Value and Role in a Balanced Portfolio, 2018-01-29 NASA's Science Mission Directorate SMD currently operates over five dozen missions with approximately two dozen additional missions in development These missions span the scientific fields associated with SMD's four divisions Astrophysics Earth Science Heliophysics and Planetary Sciences Because a single mission can consist of multiple spacecraft NASA SMD is responsible for nearly 100 operational spacecraft The most high profile of these are the large strategic missions often referred to as flagships Large strategic missions are essential to maintaining the global leadership of the United States in space exploration and in science because only the United States has the budget technology and trained personnel in multiple scientific fields to conduct missions that attract a range of international partners This report examines the role of large strategic missions within a balanced program across NASA SMD space and Earth sciences programs It considers the role and scientific productivity of such missions in advancing science technology and the long term health of the field and provides guidance that NASA can use to help set the priority of larger missions within a properly balanced program containing a range of mission classes

*Treaties on Transit of Energy Via Pipelines and Countermeasures* Danai Azaria, 2015 This monograph examines the relationship between treaties providing for uninterrupted energy transit and countermeasures under the law of international responsibility It analyses the obligations governing energy transit through pipelines in multilateral and bilateral treaties looking at the WTO Agreement the Energy Charter Treaty and sixteen bespoke pipeline treaties It argues that some transit obligations reflect the community interest of states parties The analysis is placed

in the historical and normative landscape of freedom of transit in international law After setting out the content and scope of obligations concerning transit of energy it distinguishes countermeasures from treaty law responses and examines the dispute settlement and compliance supervision provisions in these treaties Building on these findings the work discusses the availability and lawfulness of countermeasures as on the one hand a means of implementing the transit states responsibility for interruptions of energy transit via pipelines and on the other hand circumstances that preclude the wrongfulness of the transit states interruptions of transit
