Juridification and Social Citizenship in the Welfare State Henriette Sinding Aasen, Siri Gloppen, Anne-Mette Magnussen, Even Nilssen, 2014-09-26 The concept of juridification refers to a diverse set of processes involving shifts towards more detailed legal regulation regulations of new areas and conflicts and problems increasingly being framed in legal and rights oriented terms This timely *Collaborating Against Child Abuse* Susanna Johansson, Kari Stefansen, Elisiv Bakketeig, Anna Kaldal, 2017-10-18 This book is open access under a CC BY 4.0 license This edited collection explores the background and implementation of the Nordic Barnahus or Children's House model recognised as one of the most important reforms related to children who are the victims of crime in the Nordic region This book discusses both its potential to affect change and the challenges facing it The model was introduced as a response to a growing recognition of the need for more integrated and child centred services for children exposed to violence and sexual abuse In the Barnahus structure different professions work together to ensure that victimized children receive help and treatment and that their legal rights are met This original study is organised into four broad themes child friendliness support and treatment the forensic child investigative interview children's rights perspectives and interagency collaboration and professional autonomy Each themed section includes in depth chapters from different Nordic countries outlining and analysing the practice and outcomes of the collaborative work engaged in by Barnahus from different perspectives The introductory and concluding chapters offer a comparative lens useful for policy and practice implementation within the Nordic welfare state context and beyond ensuring this book has global academic and practical appeal

Revolution and Evolution in Private Law Sarah Worthington, Andrew Robertson, Graham Virgo, 2018-01-11 The development of private law across the common law world is typically portrayed as a series of incremental steps each one delivered as a result of judges dealing with marginally different factual circumstances presented to them for determination This is said to be the common law method According to this process change might be assumed to be gradual almost imperceptible If this were true however then even Darwinian style evolution which is subject to major change inducing pressures such as the death of the dinosaurs would seem unlikely in the law and radical and revolutionary paradigm shifts perhaps impossible And yet the history of the common law is to the contrary The legal landscape is littered with quite remarkable revolutionary and evolutionary changes in the shape of the common law The essays in this volume explore some of the highlights in this fascinating revolutionary and evolutionary development of private law The contributors expose the nature of the changes undergone and their significance for the future direction of travel They identify the circumstances and the contexts which might have provided an impetus for these significant changes The essays range across all areas of private law including contract tort unjust enrichment and property No area has been immune from development That fact itself is unsurprising but an extended examination of the particular circumstances and contexts which delivered some of private law's most important developments has its own special

significance for what it might indicate about the shape and the shaping of private law regimes in the future
