Towards Industry 4.0 — Current Challenges in Information Systems Marcin Hernes, Artur Rot, Dorota Jelonek, 2020-03-10

This book discusses various aspects of Industry 4.0 from the perspective of information system evolution. Industry 4.0 refers to a new phase in the industrial revolution that relies heavily on interconnectivity, automation, machine learning, real-time data, the Internet of Things, and blockchain technology. The interdisciplinary book addresses a number of topics related to modern information technologies and presents innovative concepts, methods, models, and tools for the development of information systems to support Industry 4.0. Focusing on artificial intelligence, collective knowledge processing, and blockchain technology, it appeals to a wide readership including researchers, students, business managers, and professionals, software developers, as well as IT and management specialists.

Looseleaf for Cost Management: A Strategic Emphasis Edward Blocher, Paul Juras, Steven Smith, 2021-01-12

Cost Management: A Strategic Emphasis by Blocher, Juras, Smith is dedicated to answering the question: Why Cost Management? It answers this question by providing cost management tools and techniques needed to support an organization's competitiveness, improve its performance, and help the organization accomplish its strategy. The text is written to help students understand the broader role of cost accounting in helping an organization succeed, and not just the measurement of costs. While the text does include coverage of traditional costing topics (e.g., job order costing, process costing, service department cost allocations, and accounting for joint and by-products), its primary strength is the linkage of these topics as well as more contemporary topics to an organization's strategy. And with Connect, an easy-to-use homework and learning management solution that embeds learning science and award-winning adaptive tools to improve student outcomes, instructors receive a course solution that includes high-quality content and assessment paired with assignments that help students build the skills they need to succeed.

Cost Management Edward Blocher, Kung Chen, Gary Cokins, Thomas Lin, 2004-02. **Cost Management: A Strategic Emphasis** by Blocher, Chen, Cokins, Lin is the first cost accounting text to offer integrated coverage of strategic management topics in cost accounting. The text is written to help students understand more about management and the role of cost management in helping a firm or organization to succeed. This text aims to teach management concepts and methods and how managers use cost management information to make better decisions and improve their company's competitiveness. In teaching these key management skills, the text takes on a strategic focus. It uncovers issues such as: how does a firm compete? What type of cost management information is needed for a firm to succeed? and How does the management accountant develop and present this information? This text helps students learn why, when, and how cost information is used to make effective decisions that lead a firm to success.
