**Encyclopedia of Medical Decision Making** Michael W. Kattan, Mark E. Cowen, 2009-08-18 The Encyclopedia of Medical Decision Making presents state of the art research and ready to use facts sorting out findings on medical decision making and their applications Medical Decision Making, 1987 Decision Making in Health Care Gretchen B. Chapman, Frank A. Sonnenberg, 2000 Decision making is a crucial element in the field of medicine The physician has to determine what is wrong with the patient and recommend treatment while the patient has to decide whether or not to seek medical care and go along with the treatment recommended by the physician Health policy makers and health insurers have to decide what to promote what to discourage and what to pay for Together these decisions determine the quality of health care that is provided Decision Making in Health Care first published in 2000 is a comprehensive overview of the field of medical decision making a rapidly expanding field that includes quantitative theoretical tools for modeling decisions psychological research on how decisions are actually made and applied research on how physician and patient decision making can be improved **Non-Medical Influences upon Medical Decision-Making and Referral Behavior** Darren Flynn, Paul van Schaik, Anna van Wersch, Andy Douglass, Paul Cann, 2003-04-30 This bibliography presents studies of nonmedical factors patient clinician and practice variables that influence medical decision making Those factors include age gender and presentational style of the patient age years in practice and attitudes of the clinician and geographical location and list size of the practice The authors separate such factors into two categories The first is decision making in the context of general patient management such as test ordering diagnoses and treatment recommendations The second category is decision making in the context of referrals made by generalists to specialists Each published study identified from an extensive literature search is presented in a structured tabular format with a brief summary of the study features described above The studies cited were published in years spanning 1980 to March 2001 Researchers and clinicians as well as graduate and postgraduate students in all medical disciplines will find this volume of interest as will health psychologists health economists and social psychologists This work integrates published research about medical decision making that has earlier only been fragmented and spread across a variety of journals A chapter on methodological considerations in medical decision making research and a chapter on models of medical decision making are included *Medical Decision Making* Jan Hendrik Bommel, François Grémy, Jana Zvárová, 1985 Hardbound These papers clearly demonstrate the developments within Artificial Intelligence in medicine The topics discussed may be categorized thus theoretical and procedural approaches such as Artificial Intelligence techniques statistical methods logical techniques and Expert and Consultation Systems in general applications in medical decision making covering laboratories image processing clinical applications medical assessment and teaching perspectives of medical support systems including the development of AI languages development of special hardware and future systems integration Rational Medical Decision Making: A Case-Based Approach Goutham

Rao,2006-12-08 All the key principles of medical decision making in one compact case based guide The book provides a comprehensive overview of many core principles in research design and analysis It is logically organized with clear learning objectives at the beginning of each chapter and pertinent examples to illustrate key concepts The author does a wonderful job of simplifying a subject that has caused much confusion for many medical students and physicians This is a book that I would enthusiastically recommend to other medical students 5 Stars Doody s Review Service Rational Medical Decision Making A Case Based Approach is a hands on text that clarifies the process of evidence based medical decision making like no other source Following the trusted LANGE format this portable volume is ideal for learning the fundamentals of evidence based medical practice and skills Whether you are a student resident or a clinician here is where you ll find all the right tools including case studies learning objectives and self assessment exercises to take your decision making skills to the next level Features Full spectrum coverage from basic statistics medical literature interpretation and statistics and data application to different types of research methodologies Case based orientation in each chapter featuring cases designed to highlight the important principles discussed in that chapter Focus on learning critical evidence based medicine concepts such as Positive Predictive Values Number Needed to Treat Statistics Pre Test Probability Sensitivity and Specificity and more Engaging discussion of research methods in the context of diagnosis and therapeutics centered studies An overview of the construction and evidentiary basis of Clinical Practice Guidelines with a look at their definition purpose and use in aiding patient care decisions Anatomy of a Research Article chapter that goes beyond the interpretation of medical literature to describe the process through which articles are published
