June 2015 Business Studies Memorandum:

Managing Sustainable Business Gilbert G. Lenssen, N. Craig Smith, 2018-03-07 This book offers 32 texts and case studies from across a wide range of business sectors around a managerial framework for Sustainable Business. The case studies are developed for and tested in executive education programmes at leading business schools. The book is based on the premise that the key for managing the sustainable business is finding the right balance over time between managing competitiveness and profitability AND managing the context of the business with its political, social and ecological risks and opportunities. In that way, a sustainable business is highly responsive to the demands and challenges from both markets and societies and managers embrace the complexity, ambivalence and uncertainty that goes along with this approach. The book presents a framework that facilitates the adoption of best business practice. This framework leads executives through a systematic approach of strategic analysis and business planning in risk management, issues management, stakeholder management, sustainable business development and strategic differentiation, business model innovation and developing dynamic capabilities. The approach helps broaden the understanding of what sustainable performance means by protecting business value against sustainability risks and creating business value from sustainability opportunities. **Competition Law,**

Regulation and SMEs in the Asia-Pacific Michael T. Schaper, 2017-03-09 Small and medium-sized enterprises (SMEs) account for more than 90 per cent of all businesses in the Asia-Pacific region, an area which is rapidly updating its competition laws and regulations to encourage greater entrepreneurship and open dynamic economies. Yet SMEs are almost invisible when those competition policies and laws are developed and enforced. SMEs are often quite different businesses than large multinational corporations, but their nature, significance and characteristics are often overlooked. This book seeks to rectify the relative neglect in research and policy discussions on the role of the SME sector in competition policy and law. Drawing on contributions from a wide range of competition regulators, lawyers, academics, consultants and advisers to the SME sector, it addresses such important issues as perceptions and views of small businesses about competition law, regulator engagement and education of the SME sector, the link between competition law and economic growth, franchising SMEs and competition law issues in enforcing competition law against SMEs, the role of Chinese family firms, trade professional and industry associations, country case studies from Vietnam, Singapore, Indonesia, Malaysia, China, South Korea, Hong Kong, SAR, Japan and the Pacific Islands. *Sovereign Wealth Funds, Local Content Policies and CSR* Eduardo G. Pereira, Rochelle

Spencer, Jonathon W. Moses, 2021-01-25 This book explores three particular strategies in the extractives sector for creating shared wealth, increased labour opportunities and positive social, environmental and economic outcomes from corporate projects: namely state wealth funds (SWF), local content policies (LCP) and corporate social responsibility (CSR) practices. Collectively, the chapters explore the associated experiences and challenges in different parts of the world with the view to inform equitable and sustainable development for the communities living adjacent to extractives sites and the wider society.

and environment Examples of LCPs SWFs and CSR practices from 12 jurisdictions with diverse experiences offer useful insights The book illuminates challenges and opportunities for sustainable development outcomes of the extractives sector It reflects the need to take on board the lessons of these global experiences in order to improve outcomes for poverty reduction inequality reduction and sustainable development
