The Normal Accident Theory of Education Andrew K. Milton, 2014-04-01 Much of the current debate about education too often resembles the blind men describing an elephant apprehending only a particular part of the situation or the process many analysts tell an evocative but incomplete story The so called reform discussion proceeds with a lack of depth about the nuances and realistic limitations in the institutional order of school This book argues that as regulation of schools moves further up the bureaucratic hierarchy first to state departments of education then to the national department of education the legal and institutional requirements get more intensive but less concretely useful in class rooms This bureaucratization serves to tighten the organizational environment thereby increasing the risk of normal accidents The increasing governmental management in other words makes it more likely that schools will fail to meet their goals Analyses of education are too often developed for public consumption in a fast moving political world This book examines some of the deeper organizational reasons why things don't work so well in school as well as a look at some of things that do work Most importantly the book will explain how the social and cultural expectations of what schools can do may create unrealistic hopes We as a society and schools as institutions embrace these unreasonably high hopes at our collective peril Check out Andrew's latest interview with Seattle Radio <http://kiroradio.com> listen 9972862 Breaking Ranks Colin Diver, 2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America's colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality **Inequality**

in America Stephen M. Caliendo, 2018-05-15 Why does inequality have such a hold on American society and public policy And what can we as citizens do about it Inequality in America takes an in depth look at race class and gender based inequality across a wide range of issues from housing and education to crime employment and health Caliendo explores how individual attitudes can affect public opinion and lawmakers policy solutions He also illustrates how these policies result in systemic barriers to advancement that often then contribute to individual perceptions This cycle of disadvantage and advantage can be difficult though not impossible to break Representing and What Can I Do feature boxes throughout the book highlight key public figures who have worked to combat inequality and encourage students to take action to do the same The second edition has been thoroughly revised to include the most current data and to cover recent issues and events like the 2016 elections and the Black Lives Matter movement It now also includes a brand new chapter on crime and criminal justice and an expanded discussion of immigration Concise and accessible Inequality in America paves the way for students to think critically about the attitudes behaviors and structures of inequality

Measuring Success Jack Buckley, Lynn Letukas, Ben Wildavsky, 2018-01-15 Standardized tests have become the gateway to higher education but should they be For more than seventy five years standardized tests have been considered a vital tool for gauging students readiness for college However few people including students parents teachers and policy makers understand how tests like the SAT or ACT are used in admissions decisions Once touted as the best way to compare students from diverse backgrounds these tests are now increasingly criticized as being biased in favor of traditionally privileged groups A small but growing number of colleges have made such testing optional for applicants Is this the right way to go Measuring Success investigates the research and policy implications of test optional practices considering both sides of the debate Does a test optional policy result in a more diverse student body or improve attainment and retention rates Drawing upon the expertise of higher education researchers admissions officers enrollment managers and policy professionals this volume is among the first to investigate the research and policy implications of test optional practices Although the test optional movement has received ample attention its claims have rarely been subjected to empirical scrutiny This volume provides a much needed evaluation of the use and value of standardized admissions tests in an era of widespread grade inflation It will be of great value to those seeking to strike the proper balance between uniformity and fairness in higher education Contributors Andrew S Belasco A Emiko Blalock William G Bowen Jim Brooks Matthew M Chingos James C Hearn Michael Hurwitz Jonathan Jacobs Nathan R Kuncel Jason Lee Jerome A Lucido Eric Maguire Krista Mattern Michael S McPherson Kelly O Rosinger Paul R Sackett Edgar Sanchez Dhruv B Sharma Emily J Shaw Kyle Sweitzer Roger J Thompson Meredith Welch Rebecca Zwick
