Junkyard Planet Travels In The Billion Dollar Trash Trade:

Junkyard Planet Adam Minter, 2015-04-14 When you drop your Diet Coke can or yesterday's newspaper in the recycling bin where does it go Probably halfway around the world to people and places that clean up what you don't want and turn it into something you can't wait to buy In Junkyard Planet Adam Minter veteran journalist and son of an American junkyard owner travels deep into a vast often hidden five hundred billion dollar industry that's transforming our economy and environment With unmatched access to and insight on the waste industry and the explanatory gifts and an eye for detail worthy of a John McPhee or a William Langewiesche Minter traces the export of America's junk and the massive profits that China and other rising nations earn from it What emerges is an engaging colorful and sometimes troubling tale of how the way we consume and discard stuff fuels a world that recognizes value where Americans don't Junkyard Planet reveals that Americans might need to learn a smarter way to take out the trash *SUMMARY* Edition Shortcut (author), 1901

refurbishment and materials recovery He asks how we know waste how we measure it and how we construe it and how this affects our efforts to mitigate it We might not put so much faith in household recycling if we counted the more massive amounts of pre consumer electronic waste as official e waste Lepawsky charts the minescapescapes productionscapescapes and clickscapes of electronics and the uneven discardscapescapes they produce Finally he considers both conventional and unconventional e waste solutions including decriminalizing export for reuse repair and upgrade enabling ethical trade in electronics reuse repair refurbishment and recycling implementing extended producer responsibility and instituting robust forms of public oversight

The Green Book Gideon Rose,2015-06-05 Although we re not particularly well known for it we at Foreign Affairs care a great deal about the state of the physical world and all its inhabitants and have run a substantial number of articles about environmental conservation and climate issues So we decided this spring that it was time to pull together some of the highlights of our coverage in this special collection The articles presented span a range of topics and perspectives from Steven M Wise on animal rights to Bjorn Lomborg on environmental alarmism Elizabeth Economy on China s pollution problem and Fred Krupp on fracking Reading them over it is hard not to be shaken by the scale of the damage being wrought on the planet and its non human inhabitants by rapid unregulated growth around the globe But it is also hard not to recognize how much sensible public policy could do to address the problem We hope this is a useful guide in those efforts
