- The outside phone cannot find the outside network
  - Check whether the outside phone is connected to a net
  - Check the value of `IP` field from net if it is abnormal? If the outside network will connect from host after waiting phone (i.e., phone cannot call the network and the network cannot connect phone)
- There is something wrong with the outside network while using it
  - Please try to connect with the outside phone after waiting it (i.e. not waiting the network)
  - Check the changing value of the network by calling from net the changing the value of the net (i.e. network) (i.e., then you can see what the network is connected with the outside phone)

- The wireless network always disconnects or make some other connection to the mobile device.
- The wireless network point access is too close to the edge.
- There is an obstruction between the mobile device and the wireless network, or the wireless device is moving out of range. Please do not cover the wireless network with your hand in order to maximize the continuous capacity of the signal. Please try to keep the wireless network and the mobile device in the same direction.
