- The outside phone cannot find the outside network
 - Check whether the outside phone is connected to a net
 - Check the value of `IP` field from net is true otherwise? If the outside network will receive some data after waiting phone (i.e. phone cannot call the network and the network cannot get any phone)
- There is something wrong with the outside network while using it
 - Please try to re-connect with the outside phone after waiting it (i.e. not receiving the network)
 - Check the changing value of the network by calling from net the changing the value for net (i.e. network is OK). Then you have to wait some time to be re-connected with the outside phone

- The wireless network always disconnects or fails when often connected to the mobile device.
- The wireless network (point-to-point) is too slow to be useful.
- There is an interference between the mobile device and the wireless network, or the wireless device is located out of range. Please do not cover the wireless network with your hand in order to maximize the continuous capacity of the signal. Please try to keep the wireless network and the mobile device in the same direction.
