LIRR Lines on Which MP41 Cars Operated

The western portion of LIRR's system in 1942. David Keller highlighted (in red) the branches along which MP41 ran: rapid transit service along the Atlantic Branch from Flatbush Ave. to Woodhaven Jct., then south to Rockaway Park; rapid transit service continuing along the Atlantic Branch to Jamaica, with regular service out to Valley Stream, where the Far Rockaway Branch was accessed; the main line from Jamaica east to Floral Park, where the Hempstead Branch was accessed; and shuttle service between the Country Life Press station in Garden City eastward to Mitchel Field along the Central Branch, which utilized the cars beginning in 1933. Lirr Operations Manual:

The Gravy Train - An Inside Look at the Long Island Rail Road Dan Ruppert, 2003-01-19 Growing up in the suburbs of New York City on Long Island I took a keen interest in all forms of transportation especially trains After graduating college I worked as an industrial engineer for private sector corporations progressing to a middle management position within a Fortune 25 Company In 1983 I accepted a job opportunity with the Long Island Rail Road as an industrial engineer The LIRR is a government subsidized agency that is part of a larger regional organization called the Metropolitan Transportation Authority The LIRR had embarked on a very ambitious improvement program to upgrade their physical plants This plan included the construction of a new railcar maintenance facility The new facility was to replace their one hundred year old maintenance shops I was hired to develop facility layouts for the most advanced rail car maintenance facility in the country Friends and professional colleagues advised me to decline the job offer However I was a railroad buff and the opportunity to work for a railroad overshadowed any trepidations For decades the LIRR had bore the brunt of adverse publicity I would often consider much of the criticism as being too harsh and misguided Not long after commencing employment my perspective of the LIRR would be completely transformed The inefficient and workplace abuses I witnessed first hand could only flourish in publicly subsidized environment My job required me to observe and analyze the maintenance and repair operations performed on commuter railcars My next step was identifying more efficient methods I would then implement these improvements into the design of the new railcar maintenance facilities I was met with a wall of resistance and non cooperation from the unionized workforce The LIRR had languished in decades of inefficient work habits supplemented with managerial complacency and rampant nepotism I would operate in a very hostile environment that had no incentive to embrace improvements It would be in the better interests of the unions to maintain low productivity and therefore justify the gross overstaffing that existed for decades Upon completion of developing the facility layouts the next phase of my responsibilities involved coordination with design consultants hired by the LIRR The consultants were responsible for the architectural and structural designs of the new maintenance facility The consultants typically were selected based on political connections and not their level of expertise The design phase was muddled with incompetence and waste Inept project management would add tens of millions of dollars and lengthy delays to the construction phase of the project Upon completion of construction a new regime intent on maintaining the status quo within the LIRR assumes control of the new maintenance facility The new regime is not committed to capitalizing on the labor efficiencies offered by the new facility Key positions are then filled with managers intent in preserving the traditional inefficient ways of the LIRR My story concludes with the agendas of the new regime and conflicts with those who were trying to transform the LIRR into a socially responsible institution My trials and tribulations along with personal victories and setbacks are all the basis of my book **Long Island Rail Road: Morris Park Shops** David D. Morrison, 2024-10-14 David D Morrison retired Long Island Rail Road LIRR branch line manager and

railroad historian has compiled rare photographs to showcase the shops that power the LIRR the busiest railroad in North America The LIRR provides passenger rail service from Midtown Manhattan to to the far ends of Long Island at Greenport and Montauk A vast operation such as this requires a huge fleet of locomotives and cars The reliability of the fleet rests mainly upon the shop maintenance facility The Morris Park Shops opened in 1889 and closed in the early 2000s provided over a century of maintenance and repair service allowing the LIRR to develop and expand through the years The complexity of the shop facility from the days of steam locomotives to multiple unit electric cars and diesel locomotives is a fascinating chapter in LIRR history
