Word of Mouse John Riedl, Joseph Konstan, 2002-08-23. At the vanguard of the Internet revolution are two computer scientists from Minnesota who are pioneers of Collaborative Filtering (CF). CF is a technology that enables companies to understand their customers and in turn sell products, goods, and services with remarkable success. To test CF, John Riedl and Joseph Konstan built two Internet sites, MovieLens and GroupLens, that allowed users to customize their preferences for movies and news. The results were astounding. MovieLens demonstrated amazing accuracy, almost ensuring that the recommendation would prove enjoyable. In *Word of Mouse*, the authors analyze dozens of companies from Best Buy to Amazon to TiVo and show what these companies are doing right and what they are doing wrong. Riedl and Konstan map out a broad range of strategies that companies can employ to raise revenue, customer loyalty, and satisfaction.

Books and Beyond Kenneth Womack, 2008-10-30 There's a strong interest in reading for pleasure or self-improvement in America as shown by the popularity of Harry Potter and book clubs including Oprah Winfrey's. Although recent government reports show a decline in recreational reading, the same reports show a strong correlation between interest in reading and academic achievement. This set provides a snapshot of the current state of popular American literature including various types and genres. The volume presents alphabetically arranged entries on more than 70 diverse literary categories such as cyberpunk, fantasy, literature, flash fiction, LGBTQ literature, graphic novels, manga, and anime and zines. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected general bibliography. Reading in America for pleasure and knowledge continues to be popular even while other media compete for attention. While students continue to read many of the standard classics, new genres have emerged. These have captured the attention of general readers and are also playing a critical role in the language arts classroom. This book maps the state of popular literature and reading in America today, including the growth of new genres such as cyberpunk, zines, flash fiction, LGBTQ literature, and other topics. Each entry is written by an expert contributor and provides a definition of the genre, an overview of its history, a look at trends and themes, a discussion of how the literary form engages contemporary issues, a review of the genre's critical reception, a discussion of authors and works, and suggestions for further reading. Sidebars provide fascinating details, and the set closes with a selected general bibliography. Students will find this book a valuable guide to what they're reading today and will appreciate its illumination of popular culture and contemporary social issues.

Diffusion of Innovations, 5th Edition Everett M. Rogers, 2003-08-16 Now in its fifth edition, *Diffusion of Innovations* is a classic work on the spread of new ideas. In this renowned book, Everett M. Rogers, professor and chair of the Department of Communication Journalism at the University of New Mexico, explains how new ideas spread via communication channels over time. Such innovations are initially perceived as uncertain and even risky. To overcome this uncertainty, most people seek out others like themselves who have already adopted the new idea. Thus, the diffusion process consists of a few individuals who first adopt an innovation, then spread the word among their circle of acquaintances, a process which typically takes months or years. But there are exceptions: use of the Internet in the 1990s, for example, may have spread more rapidly than any other innovation in the history of humankind. Furthermore, the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people. The fifth edition addresses the spread of the Internet and how it has transformed the way human beings communicate and adopt new ideas.
