variety of approaches to this challenge The chapters cover the perspectives of environmental scientists with expertise in evolutionary environmental biology systematic zoology and botany as well as those of researchers with expertise in philosophy ethics politics law and economics This combination facilitates a truly interdisciplinary debate by highlighting hitherto unacknowledged implications that inform current academic and political debates on biodiversity and its protection The book should be of interest to students and researchers of environment studies biodiversity environmental philosophy ethics and management

unleashing more pluralistic heterogeneous and decentralized patterns of popular representation Reducing its role in production the state became mostly a regulator of economic activities Arce and Wada's volume examines the consequences of democracy and globalization on popular protests in Latin America theorizing a broad shift of popular politics involving reactive and proactive mobilizations A collaboration of sixteen distinguished scholars with different specializations economists historians sociologists and political scientists in both the Global North and South the volume provides a unique collection of studies of protest events in ten Latin American countries Bolivia Brazil Chile Colombia Costa Rica Ecuador Mexico Nicaragua Peru and Venezuela *Initial Report Submitted by Japan Under Article 35 of the Convention* United Nations.
