minds exist in a virtual reality allowing machines to extract their bioelectric thermal and kinetic energy This article investigates the scientific feasibility of utilizing humans as a power source by applying thermodynamic principles According to the first law of thermodynamics the energy required to sustain human life would result in a net energy loss for the machines The second law indicates that the system's entropy would rise rendering it an inefficient energy strategy Furthermore the energy output of a human body even if fully utilized would be inadequate to meet the machines energy demands More efficient alternatives for the machines would include other biological power sources and energy harvesting techniques such as solar or nuclear power The article concludes that while the concept of human batteries serves as an engaging storytelling element it is not a scientifically viable solution for the machines energy requirements The machines choice to preserve human life may be motivated by other factors such as leveraging their collective cognitive abilities for computational purposes or adhering to an ethical code that prohibits the complete annihilation of humanity This investigation aims to fill the gap by providing a detailed thermodynamic analysis of the energy expenditure required to sustain human life in a suspended animation state and the inefficiency of this system as an energy source for machines a facet previously unexplored By elucidating the thermodynamic constraints of human based energy sources this study not only challenges a popular sci fi narrative but also enriches our understanding of bioenergetic processes and their implications for future energy harvesting technologies

Take a New Look at Raven BIOLOGY is an authoritative majors textbook focusing on evolution as a unifying theme. In revising the text, McGraw Hill consulted with numerous users, noted experts, and professors in the field. Biology is distinguished from other texts by its strong emphasis on natural selection and the evolutionary process that explains biodiversity. The new 8th edition continues that tradition and advances into modern biology by featuring the latest in cutting-edge content reflective of the rapid advances in biology. That same modern perspective was brought into the completely new art program, offering readers a dynamic, realistic, and accurate visual program. Cherian Ph.D., 2025-09-10. *Brilliant Bloopers Vol I and II* are sequels to the first book, *Origins of the Universe: Life and Species: New Perspectives from Science and Theology*. In this absorbing book, Dr. Cherian explains the numerous anatomical and paleontological blunders evolutionists provide as evidence, some of which are fraud and others illogical and unscientific. The Creator equipped every organism with what it needs for sustenance, survival, and their role in the ecosystem. In *Brilliant Bloopers*, the author discusses the many blunders of the theory of evolution that has become the core biological curriculum against the eternal truth that God created the universe and everything within it in a systematic order. Author stresses the fact that if it took ten to 100 million years for a new species to emerge by chance mutation, we would have only a few species in nature, and planet Earth would have been a heap of dirt. With a wealth of knowledge in Life Science and Theology and fifty years of research and teaching in varied subjects, Dr. Cherian explains the systematic order of creation, schemed as evolutionary steps. The hoax of homologous structures and the fraudulent claim of Archaeopteryx and Piltdown Man provided as evidence of missing links. The comparison of anatomical structures as blunders as God designed every creature for its survival and ecological functions. DNA is God's imprint on every species. That the human body is fearfully and wonderfully knitted together and God amazingly organized the coordinated physiology that sustains life that evolution could never do. The ecological principle of food chain is God's way of feeding all creatures and recycling of energy and matter according to thermodynamics. How evolution theory has shattered the faith of millions. For the first time ever in science or theology, Dr. Cherian explains the molecular biology of Jesus' conception and his blood. He dispels the theory of evolution and reveals the unknown God as a KNOWN God. Scientists who go about teaching that Evolution is a fact of life are great con men, and the story they are telling may be the greatest hoax ever. In explaining evolution, we do not have one iota of fact. Dr. T. N. Tahmisian, a former U.S. Atomic Energy Commission physiologist. Today, our duty is to destroy the myth of evolution, considered as a simple, understood, and explained phenomenon which keeps rapidly unfolding before us. The deceit
